Part I: PREAMBLE

The Provincial Policy Statement provides policy direction on matters of provincial interest related to land use planning and development. As a key part of Ontario's policy-led planning system, the Provincial Policy Statement sets the policy foundation for regulating the development and use of land. It also supports the provincial goal to enhance the quality of life for the citizens of Ontario.

The Provincial Policy Statement provides for appropriate development while protecting resources of provincial interest, public health and safety, and the quality of the natural environment. The Provincial Policy Statement supports improved land use planning and management, which contributes to a more effective and efficient land use planning system.

The policies of the Provincial Policy Statement may be complemented by provincial plans or by locally-generated policies regarding matters of municipal interest. Provincial plans and municipal official plans provide a framework for comprehensive, integrated and long-term planning that supports and integrates the principles of strong communities, a clean and healthy environment and economic growth, for the long term.

Land use planning is only one of the tools for implementing provincial interests. A wide range of legislation, regulations, policies and programs may also affect planning matters, and assist in implementing these interests.

Part II: LEGISLATIVE AUTHORITY

The Provincial Policy Statement is issued under the authority of Section 3 of the *Planning Act* and came into effect on March 1, 2005. It applies to all applications, matters or proceedings commenced on or after March 1, 2005.

In respect of the exercise of any authority that affects a planning matter, Section 3 of the *Planning Act* requires that decisions affecting planning matters "shall be consistent with" policy statements issued under the Act.

Part III: HOW TO READ THE PROVINCIAL POLICY STATEMENT

A policy-led planning system recognizes and addresses the complex inter-relationships among environmental, economic and social factors in land use planning. The Provincial Policy Statement supports a comprehensive, integrated and long-term approach to planning, and recognizes linkages among policy areas.

The Provincial Policy Statement is more than a set of individual policies. It is intended to be read in its entirety and the relevant policies are to be applied to each situation. A decision-maker should read all of the relevant policies as if they are specifically cross-referenced with each other. While specific policies sometimes refer to other policies for ease of use, these cross-references do not take away from the need to read the Provincial Policy Statement as a whole.

Part IV, Vision for Ontario's Land Use Planning System, provides the context for applying the Provincial Policy Statement. Implementation issues are addressed in the Implementation and Interpretation section.

Except for references to legislation which are traditionally italicized, italicized terms in the Provincial Policy Statement are defined in the Definitions section. For other terms, the normal meaning of the word applies. Terms may be italicized only in specific policies; for these terms, the defined meaning applies where they are italicized and the normal meaning applies where they are not italicized. Defined terms in the Definitions section are intended to capture both singular and plural forms of these terms in the policies.

There is no implied priority in the order in which the policies appear.

Part IV: VISION FOR ONTARIO'S LAND USE PLANNING SYSTEM

The long-term prosperity and social well-being of Ontarians depend on maintaining strong communities, a clean and healthy environment and a strong economy.

Ontario is a vast province with diverse urban, rural and northern communities which may face different challenges related to diversity in population levels, economic activity, pace of growth and physical and natural conditions. Some areas face challenges related to maintaining population and diversifying their economy, while other areas face challenges related to accommodating and managing the development and population growth which is occurring, while protecting important resources and the quality of the natural environment. The Provincial Policy Statement reflects this diversity and is based on good planning principles that apply in communities across Ontario.

The Provincial Policy Statement focuses growth within settlement areas and away from significant or sensitive resources and areas which may pose a risk to public health and safety. It recognizes that the wise management of development may involve directing, promoting or sustaining growth. Land use must be carefully managed to accommodate appropriate development to meet the full range of current and future needs, while achieving efficient development patterns.

Efficient development patterns optimize the use of land, resources and public investment in infrastructure and public service facilities. These land use patterns promote a mix of housing, employment, parks and open spaces, and transportation choices that facilitate pedestrian mobility and other modes of travel. They also support the financial well-

being of the Province and municipalities over the long term, and minimize the undesirable effects of development, including impacts on air, water and other resources. Strong, liveable and healthy communities enhance social well-being and are economically and environmentally sound.

The Province's natural heritage resources, water, agricultural lands, mineral resources, and cultural heritage and archaeological resources provide important environmental, economic and social benefits. The wise use and management of these resources over the long term is a key provincial interest. The Province must ensure that its resources are managed in a sustainable way to protect essential ecological processes and public health and safety, minimize environmental and social impacts, and meet its long-term needs.

It is equally important to protect the overall health and safety of the population. The Provincial Policy Statement directs development away from areas of natural and human-made hazards, where these hazards cannot be mitigated. This preventative approach supports provincial and municipal financial well-being over the long term, protects public health and safety, and minimizes cost, risk and social disruption.

Taking action to conserve land and resources avoids the need for costly remedial measures to correct problems and supports economic and environmental principles.

Strong communities, a clean and healthy environment and a strong economy are inextricably linked. Long-term prosperity, environmental health and social well-being should take precedence over short-term considerations.

The fundamental principles set out in the Provincial Policy Statement apply throughout Ontario, despite regional variations. To support our collective well-being, now and in the future, all land use must be well managed.

The Vision for Ontario's Land Use Planning System may be further articulated through planning direction for specific areas of the Province issued through provincial plans, such as those plans created under the *Niagara Escarpment Planning and Development Act* and the *Oak Ridges Moraine Conservation Act, 2001*, which are approved by the Lieutenant Governor in Council or the Minister of Municipal Affairs and Housing.

Part V: POLICIES

1.0 BUILDING STRONG COMMUNITIES

Ontario's long-term prosperity, environmental health and social well-being depend on wisely managing change and promoting efficient land use and development patterns. Efficient land use and development patterns support strong, liveable and healthy communities, protect the environment and public health and safety, and facilitate economic growth.

Accordingly:

1.1 MANAGING AND DIRECTING LAND USE TO ACHIEVE EFFICIENT DEVELOPMENT AND LAND USE PATTERNS

1.1.1 Healthy, liveable and safe communities are sustained by:

- a) promoting efficient development and land use patterns which sustain the financial well-being of the Province and municipalities over the long term;
- b) accommodating an appropriate range and mix of residential, employment (including industrial, commercial and institutional uses), recreational and open space uses to meet long-term needs;
- c) avoiding development and land use patterns which may cause environmental or public health and safety concerns;
- d) avoiding development and land use patterns that would prevent the efficient expansion of *settlement areas* in those areas which are adjacent or close to *settlement areas*;

- c) promoting cost-effective development standards to minimize land consumption and servicing costs;
- f) improving accessibility for persons with disabilities and the elderly by removing and/or preventing land use barriers which restrict their full participation in society; and
- g) ensuring that necessary *infrastructure* and *public service facilities* are or will be available to meet current and projected needs.

1.1.2 Sufficient land shall be made available through *intensification* and *redevelopment* and, if necessary, *designated growth areas*, to accommodate an appropriate range and mix of employment opportunities, housing and other land uses to meet projected needs for a time horizon of up to 20 years. However, where an alternate time period has been established for specific areas of the Province as a result of a provincial planning exercise or a *provincial plan*, that time frame may be used for municipalities within the area.

1.1.3 Settlement Areas

1.1.3.1 *Settlement areas* shall be the focus of growth and their vitality and regeneration shall be promoted.

1.1.3.2 Land use patterns within *settlement areas* shall be based on:

- a) densities and a mix of land uses which:
 - 1. efficiently use land and resources;
 - 2. are appropriate for, and efficiently use, the *infrastructure* and *public service facilities* which are planned or available, and avoid the need for their unjustified and/or uneconomical expansion; and
 - 3. minimize negative impacts to air quality and climate change, and promote energy efficiency in accordance with policy 1.8; and
- b) a range of uses and opportunities for *intensification* and *redevelopment* in accordance with the criteria in policy 1.1.3.3.

1.1.3.3 Planning authorities shall identify and promote opportunities for *intensification* and *redevelopment* where this can be accommodated taking into account existing building stock or areas, including *brownfield sites*, and the availability of suitable existing or planned *infrastructure* and *public service facilities* required to accommodate projected needs.

Intensification and *redevelopment* shall be directed in accordance with the policies of Section 2: Wise Use and Management of Resources and Section 3: Protecting Public Health and Safety.

1.1.3.4 Appropriate development standards should be promoted which facilitate *intensification*, *redevelopment* and compact form, while maintaining appropriate levels of public health and safety.

1.1.3.5 Planning authorities shall establish and implement minimum targets for *intensification* and *redevelopment* within built-up areas. However, where provincial targets are established through *provincial plans*, the provincial target shall represent the minimum target for affected areas.

1.1.3.6 Planning authorities shall establish and implement phasing policies to ensure that specified targets for *intensification* and *redevelopment* are achieved prior to, or concurrent with, new development within *designated growth areas*.

1.1.3.7 New development taking place in *designated growth areas* should occur adjacent to the existing built-up area and shall have a compact form, mix of uses and densities that allow for the efficient use of land, *infrastructure* and *public service facilities*.

1.1.3.8 Planning authorities shall establish and implement phasing policies to ensure the orderly progression of development within *designated growth areas* and the timely provision of the *infrastructure* and *public service facilities* required to meet current and projected needs.

1.1.3.9 A planning authority may identify a *settlement area* or allow the expansion of a *settlement area* boundary only at the time of a *comprehensive review* and only where it has been demonstrated that:

- a) sufficient opportunities for growth are not available through *intensification*, *redevelopment* and *designated growth areas* to accommodate the projected needs over the identified planning horizon;
- b) the *infrastructure* and *public service facilities* which are planned or available are suitable for the development over the long term and protect public health and safety;
- c) in *prime agricultural areas*:
 - 1. the lands do not comprise *specialty crop areas*;
 - 2. there are no reasonable alternatives which avoid *prime agricultural areas*; and
 - 3. there are no reasonable alternatives on lower priority agricultural lands in *prime agricultural areas*; and
- d) impacts from new or expanding *settlement areas* on agricultural operations which are adjacent or close to the *settlement area* are mitigated to the extent feasible.

In determining the most appropriate direction for expansions to the boundaries of *settlement areas* or the identification of a *settlement area* by a planning authority, a planning authority shall apply the policies of Section 2: Wise Use and Management of Resources and Section 3: Protecting Public Health and Safety.

1.1.4 Rural Areas in Municipalities

1.1.4.1 In *rural areas* located in municipalities:

- a) permitted uses and activities shall relate to the management or use of resources, resource-based recreational activities, limited residential development and other rural land uses;
- b) development shall be appropriate to the *infrastructure* which is planned or available, and avoid the need for the unjustified and/or uneconomical expansion of this *infrastructure*;
- c) new land uses, including the creation of lots, and new or expanding livestock facilities, shall comply with the *minimum distance separation formulae*;
- d) development that is compatible with the rural landscape and can be sustained by rural service levels should be promoted;
- e) locally-important agricultural and resource areas should be designated and protected by directing non-related development to areas where it will not constrain these uses;
- f) opportunities should be retained to locate new or expanding land uses that require separation from other uses; and
- g) recreational, tourism and other economic opportunities should be promoted.

1.1.5 Rural Areas in Territory Without Municipal Organization

1.1.5.1 In *rural areas* located in territory without municipal organization, the focus of development activity shall be activities and land uses related to the management or use of resources and resource-based recreational activities.

1.1.5.2 The establishment of new permanent townships shall not be permitted.

1.1.5.3 In areas adjacent to and surrounding municipalities, only development that is related to the management or use of resources and resource-based recreational activity shall be permitted unless:

- a) the area forms part of a planning area; and
- b) it has been determined, as part of a *comprehensive review*, that the impacts of growth will not place an undue strain on the *public service facilities* and *infrastructure* provided by adjacent municipalities, regions and/or the Province.

1.2 COORDINATION

1.2.1 A coordinated, integrated and comprehensive approach should be used when dealing with planning matters within municipalities, or which cross lower, single and/or upper-tier municipal boundaries, including:

- a) managing and/or promoting growth and development;
- b) managing natural heritage, water, agricultural, mineral, and cultural heritage and archaeological resources;
- c) *infrastructure*, *public service facilities* and *waste management systems*;
- d) ecosystem, shoreline and watershed related issues;
- e) natural and human-made hazards; and
- f) population, housing and employment projections, based on *regional market areas*.

1.2.2 Where planning is conducted by an upper-tier municipality, the upper-tier municipality in consultation with lower-tier municipalities shall:

- a) identify, coordinate and allocate population, housing and employment projections for lower-tier municipalities. Allocations and projections by upper-tier municipalities shall be based on and reflect *provincial plans* where these exist;
- b) identify areas where growth will be directed, including the identification of nodes and the corridors linking these nodes;
- c) identify targets for *intensification* and *redevelopment* within all or any of the lower-tier municipalities, including minimum targets that should be met before expansion of the boundaries of *settlement areas* is permitted in accordance with policy 1.1.3.9;
- d) where transit corridors exist or are to be developed, identify density targets for areas adjacent or in proximity to these corridors, including minimum targets that should be met before expansion of the boundaries of *settlement areas* is permitted in accordance with policy 1.1.3.9; and
- e) identify and provide policy direction for the lower-tier municipalities on matters that cross municipal boundaries.

1.2.3 Where there is no upper-tier municipality, planning authorities shall ensure that policy 1.2.2 is addressed as part of the planning process, and should coordinate these matters with adjacent planning authorities.

1.3 EMPLOYMENT AREAS

1.3.1 Planning authorities shall promote economic development and competitiveness by:

- a) providing for an appropriate mix and range of employment (including industrial, commercial and institutional uses) to meet long-term needs;
- b) providing opportunities for a diversified economic base, including maintaining a range and choice of suitable sites for employment uses which support a wide range of economic activities and ancillary uses, and take into account the needs of existing and future businesses;

- c) planning for, protecting and preserving *employment areas* for current and future uses; and
- d) ensuring the necessary *infrastructure* is provided to support current and projected needs.

1.3.2 Planning authorities may permit conversion of lands within *employment areas* to non-employment uses through a *comprehensive review*, only where it has been demonstrated that the land is not required for employment purposes over the long term and that there is a need for the conversion.

1.4 HOUSING

1.4.1 To provide for an appropriate range of housing types and densities required to meet projected requirements of current and future residents of the *regional market area* identified in policy 1.4.3, planning authorities shall:

- a) maintain at all times the ability to accommodate residential growth for a minimum of 10 years through *residential intensification* and *redevelopment* and, if necessary, lands which are *designated and available* for residential development; and
- b) maintain at all times where new development is to occur, land with servicing capacity sufficient to provide at least a 3 year supply of residential units available through lands suitably zoned to facilitate *residential intensification* and *redevelopment*, and land in draft approved and registered plans.

1.4.2 Where planning is conducted by an upper-tier municipality:

- a) the land and unit supply maintained by the lower-tier municipality identified in policy 1.4.1 shall be based on and reflect the allocation of population and units by the upper-tier municipality; and
- b) the allocation of population and units by the upper-tier municipality shall be based on and reflect *provincial plans* where these exist.

1.4.3 Planning authorities shall provide for an appropriate range of housing types and densities to meet projected requirements of current and future residents of the *regional market area* by:

- a) establishing and implementing minimum targets for the provision of housing which is *affordable* to *low and moderate income households*. However, where planning is conducted by an upper-tier municipality, the upper-tier municipality in consultation with the lower-tier municipalities may identify a higher target(s) which shall represent the minimum target(s) for these lower-tier municipalities;
- b) permitting and facilitating:
 1. all forms of housing required to meet the social, health and well-being requirements of current and future residents, including *special needs* requirements; and
 2. all forms of *residential intensification* and *redevelopment* in accordance with policy 1.1.3.3;
- c) directing the development of new housing towards locations where appropriate levels of *infrastructure* and *public service facilities* are or will be available to support current and projected needs;
- d) promoting densities for new housing which efficiently use land, resources, *infrastructure* and *public service facilities*, and support the use of alternative transportation modes and public transit in areas where it exists or is to be developed; and
- e) establishing development standards for *residential intensification*, *redevelopment* and new residential development which minimize the cost of housing and facilitate compact form, while maintaining appropriate levels of public health and safety.

1.5 PUBLIC SPACES, PARKS AND OPEN SPACE**1.5.1** Healthy, active communities should be promoted by:

- a) planning public streets, spaces and facilities to be safe, meet the needs of pedestrians, and facilitate pedestrian and non-motorized movement, including but not limited to, walking and cycling;
- b) providing for a full range and equitable distribution of publicly-accessible built and natural settings for recreation, including facilities, parklands, open space areas, trails and, where practical, water-based resources;
- c) providing opportunities for public access to shorelines; and
- d) considering the impacts of planning decisions on provincial parks, conservation reserves and conservation areas.

1.6 INFRASTRUCTURE AND PUBLIC SERVICE FACILITIES**1.6.1** *Infrastructure and public service facilities* shall be provided in a coordinated, efficient and cost-effective manner to accommodate projected needs.

Planning for *infrastructure and public service facilities* shall be integrated with planning for growth so that these are available to meet current and projected needs.

1.6.2 The use of existing *infrastructure and public service facilities* should be optimized, wherever feasible, before consideration is given to developing new *infrastructure and public service facilities*.**1.6.3** *Infrastructure and public service facilities* should be strategically located to support the effective and efficient delivery of emergency management services.

Where feasible, *public service facilities* should be co-located to promote cost-effectiveness and facilitate service integration.

1.6.4 Sewage and Water**1.6.4.1** Planning for *sewage and water services* shall:

- a) direct and accommodate expected growth in a manner that promotes the efficient use of existing:
 - 1. *municipal sewage services and municipal water services*; and
 - 2. *private communal sewage services and private communal water services*, where *municipal sewage services and municipal water services* are not available;
- b) ensure that these systems are provided in a manner that:
 - 1. can be sustained by the water resources upon which such services rely;
 - 2. is financially viable and complies with all regulatory requirements; and
 - 3. protects human health and the natural environment;
- c) promote water conservation and water use efficiency;
- d) integrate servicing and land use considerations at all stages of the planning process; and
- e) subject to the hierarchy of services provided in policies 1.6.4.2, 1.6.4.3 and 1.6.4.4, allow lot creation only if there is confirmation of sufficient *reserve sewage system capacity and reserve water system capacity* within *municipal sewage services and municipal water services* or *private communal sewage services and private communal water services*. The determination of sufficient *reserve sewage system capacity* shall include treatment capacity for hauled sewage from *private communal sewage services and individual on-site sewage services*.

1.6.4.2 *Municipal sewage services and municipal water services* are the preferred form of servicing for *settlement areas*.

Intensification and redevelopment within settlement areas on existing municipal sewage services and municipal water services should be promoted, wherever feasible.

1.6.4.3 Municipalities may choose to use *private communal sewage services and private communal water services*, and where policy 1.6.4.4 permits, *individual on-site sewage services and individual on-site water services*, where:

- a) *municipal sewage services and municipal water services* are not provided; and
- b) the municipality has established policies to ensure that the services to be provided satisfy the criteria set out in policy 1.6.4.1.

1.6.4.4 *Individual on-site sewage services and individual on-site water services* shall be used for a new development of five or less lots or private residences where *municipal sewage services and municipal water services* or *private communal sewage services and private communal water services* are not provided and where site conditions are suitable for the long-term provision of such services. Despite this, *individual on-site sewage services and individual on-site water services* may be used to service more than five lots or private residences in *rural areas* provided these services are solely for those uses permitted by policy 1.1.4.1(a) and site conditions are suitable for the long-term provision of such services.**1.6.4.5** *Partial services* shall only be permitted in the following circumstances:

- a) where they are necessary to address failed *individual on-site sewage services and individual on-site water services* in existing development; and
- b) within *settlement areas*, to allow for infilling and rounding out of existing development on *partial services* provided that:
 - 1. the development is within the *reserve sewage system capacity and reserve water system capacity*; and
 - 2. site conditions are suitable for the long-term provision of such services.

1.6.6.4 When planning for corridors and rights-of-way for significant transportation and *infrastructure* facilities, consideration will be given to the significant resources in Section 2: Wise Use and Management of Resources.

1.6.7 Airports

1.6.7.1 Planning for land uses in the vicinity of *airports* shall be undertaken so that:

- a) the long-term operation and economic role of *airports* is protected; and
- b) *airports* and *sensitive land uses* are appropriately designed, buffered and/or separated from each other to prevent adverse effects from odour, noise and other contaminants.

1.6.7.2 *Airports* shall be protected from incompatible land uses and development by:

- a) prohibiting new residential *development* and other sensitive land uses in areas near *airports* above 30 NEF/NEP, as set out on maps (as revised from time to time) that have been reviewed by Transport Canada;
- b) considering redevelopment of existing residential uses and other sensitive land uses or infilling of residential and other sensitive land uses in areas above 30 NEF/NEP only if it has been demonstrated that there will be no negative impacts on the long-term function of the *airport*; and

- e) planning so that major facilities (such as airports, transportation/transit/rail infrastructure and corridors, intermodal facilities, sewage treatment facilities, waste management systems, oil and gas pipelines, industries and resource extraction activities) and *sensitive land uses* are appropriately designed, buffered and/or separated from each other to prevent *adverse effects* from odour, noise and other contaminants, and minimize risk to public health and safety;
- f) providing opportunities for sustainable tourism development;
- g) promoting the sustainability of the agri-food sector by protecting agricultural resources and minimizing land use conflicts; and

- h) providing opportunities for increased energy generation, supply and conservation, including *alternative energy systems* and *renewable energy systems*.

1.8 ENERGY AND AIR QUALITY

1.8.1 Planning authorities shall support energy efficiency and improved air quality through land use and development patterns which:

- e) promote design and orientation which maximize the use of alternative or renewable energy, such as solar and wind energy, and the mitigating effects of vegetation.

1.8.2 Increased energy supply should be promoted by providing opportunities for energy generation facilities to accommodate current and projected needs, and the use of *renewable energy systems* and *alternative energy systems*, where feasible.

1.8.3 *Alternative energy systems* and *renewable energy systems* shall be permitted in *settlement areas*, *rural areas* and *prime agricultural areas* in accordance with *provincial and federal requirements*. In *rural areas* and *prime agricultural areas*, these systems should be designed and constructed to minimize impacts on agricultural operations.

2.0 WISE USE AND MANAGEMENT OF RESOURCES

Ontario's long-term prosperity, environmental health, and social well-being depend on protecting natural heritage, water, agricultural, mineral and cultural heritage and archaeological resources for their economic, environmental and social benefits.

Accordingly:

2.1 NATURAL HERITAGE

2.1.1 Natural features and areas shall be protected for the long term.

2.1.2 The diversity and connectivity of natural features in an area, and the long-term *ecological function* and biodiversity of *natural heritage systems*, should be maintained, restored or, where possible, improved, recognizing linkages between and among *natural heritage features and areas*, *surface water features* and *ground water features*.

2.1.3 *Development* and *site alteration* shall not be permitted in:

- a) *significant habitat of endangered species and threatened species*;
- b) *significant wetlands* in Ecoregions 5E, 6E and 7E¹; and
- c) *significant coastal wetlands*.

2.1.4 *Development* and *site alteration* shall not be permitted in:

2.1.5 *Development and site alteration shall not be permitted in fish habitat except in accordance with provincial and federal requirements.*

2.1.6 *Development and site alteration shall not be permitted on adjacent lands to the natural heritage features and areas identified in policies 2.1.3, 2.1.4 and 2.1.5 unless the ecological function of the adjacent lands has been evaluated and it has been demonstrated that there will be no negative impacts on the natural features or on their ecological functions.*

2.1.7 Nothing in policy 2.1 is intended to limit the ability of existing agricultural uses to continue.

2.2 WATER

2.2.1 Planning authorities shall protect, improve or restore the *quality and quantity of water* by:

- a) using the *watershed* as the ecologically meaningful scale for planning;
- b) minimizing potential *negative impacts*, including cross-jurisdictional and cross-watershed impacts;
- c) identifying *surface water features, ground water features, hydrologic functions and natural heritage features and areas* which are necessary for the ecological and hydrological integrity of the *watershed*;
- d) implementing necessary restrictions on *development and site alteration* to:
 1. protect all municipal drinking water supplies and *designated vulnerable areas*; and
 2. protect, improve or restore *vulnerable surface and ground water, sensitive surface water features and sensitive ground water features*, and their *hydrologic functions*;
- e) maintaining linkages and related functions among *surface water features, ground water features, hydrologic functions and natural heritage features and areas*;
- f) promoting efficient and sustainable use of water resources, including practices for water conservation and sustaining water quality; and
- g) ensuring stormwater management practices minimize stormwater volumes and contaminant loads, and maintain or increase the extent of vegetative and pervious surfaces.

2.2.2 *Development and site alteration shall be restricted in or near sensitive surface water features and sensitive ground water features such that these features and their related hydrologic functions will be protected, improved or restored.*

Mitigative measures and/or alternative development approaches may be required in order to protect, improve or restore *sensitive surface water features, sensitive ground water features, and their hydrologic functions*.

2.3 AGRICULTURE

2.3.1 *Prime agricultural areas* shall be protected for long-term use for agriculture.

Prime agricultural areas are areas where *prime agricultural lands* predominate. *Specialty crop areas* shall be given the

highest priority for protection, followed by Classes 1, 2 and 3 soils, in this order of priority.

2.3.2 Planning authorities shall designate *specialty crop areas* in accordance with evaluation procedures established by the Province, as amended from time to time.

2.3.3 Permitted Uses

2.3.3.1 In *prime agricultural areas*, permitted uses and activities are: *agricultural uses, secondary uses and agriculture-related uses*.

Proposed new *secondary uses* and *agriculture-related uses* shall be compatible with, and shall not hinder, surrounding agricultural operations. These uses shall be limited in scale, and criteria for these uses shall be included in municipal planning documents as recommended by the Province, or based on municipal approaches which achieve the same objective.

2.3.3.2 In *prime agricultural areas*, all types, sizes and intensities of *agricultural uses and normal farm practices* shall be promoted and protected in accordance with provincial standards.

2.3.3.3 New land uses, including the creation of lots, and new or expanding livestock facilities shall comply with the *minimum distance separation formulae*.

2.3.4 Lot Creation and Lot Adjustments

2.3.4.1 Lot creation in *prime agricultural areas* is discouraged and may only be permitted for:

- a) *agricultural uses*, provided that the lots are of a size appropriate for the type of agricultural use(s) common in the area and are sufficiently large to maintain flexibility for future changes in the type or size of agricultural operations;
- b) *agriculture-related uses*, provided that any new lot will be limited to a minimum size needed to accommodate the use and appropriate *sewage and water services*;
- c) a *residence surplus to a farming operation* as a result of farm consolidation, provided that the planning authority ensures that new residential dwellings are prohibited on any vacant remnant parcel of farmland created by the severance. The approach used to ensure that no new residential dwellings are permitted on the remnant parcel may be recommended by the Province, or based on municipal approaches which achieve the same objective; and
- d) *infrastructure*, where the facility or corridor cannot be accommodated through the use of easements or rights-of-way.

2.3.4.2 Lot adjustments in *prime agricultural areas* may be permitted for *legal or technical reasons*.

2.3.4.3 The creation of new residential lots in *prime agricultural areas* shall not be permitted, except in accordance with policy 2.3.4.1(c).

2.3.5 Removal of Land from Prime Agricultural Areas

2.3.5.1 Planning authorities may only exclude land from *prime agricultural areas* for:

- a) expansions of or identification of *settlement areas* in accordance with policy 1.1.3.9;
- b) extraction of *minerals, petroleum resources and mineral aggregate resources*, in accordance with policies 2.4 and 2.5; and
- c) limited non-residential uses, provided that:
 1. the land does not comprise a *specialty crop area*;
 2. there is a demonstrated need within the planning horizon provided for in policy 1.1.2 for additional

² Areas south and east of the Canadian Shield are shown on Figure 1.

land to be designated to accommodate the proposed use;

3. there are no reasonable alternative locations which avoid *prime agricultural areas*; and
4. there are no reasonable alternative locations in *prime agricultural areas* with lower priority agricultural lands.

2.3.5.2 Impacts from any new or expanding non-agricultural uses on surrounding agricultural operations and lands should be mitigated to the extent feasible.

2.4 MINERALS AND PETROLEUM

2.4.1 *Minerals and petroleum resources* shall be protected for long-term use.

2.4.2 Protection of Long-Term Resource Supply

2.4.2.1 *Mineral mining operations and petroleum resource operations* shall be protected from *development* and activities that would preclude or hinder their expansion or continued use or which would be incompatible for reasons of public health, public safety or environmental impact.

2.4.2.2 In areas adjacent to or in known *mineral deposits* or known *petroleum resources*, and in *significant areas of mineral potential and significant areas of petroleum potential, development* and activities which would preclude or hinder the establishment of new operations or access to the resources shall only be permitted if:

- a) resource use would not be feasible; or
- b) the proposed land use or development serves a greater long-term public interest; and
- c) issues of public health, public safety and environmental impact are addressed.

2.4.3 Rehabilitation

2.4.3.1 Rehabilitation to accommodate subsequent land uses shall be required after extraction and other related activities have ceased. Progressive rehabilitation should be undertaken wherever feasible.

2.4.4 Extraction in Prime Agricultural Areas

2.4.4.1 Extraction of *minerals and petroleum resources* is permitted in *prime agricultural areas*, provided that the site is rehabilitated.

2.5 MINERAL AGGREGATE RESOURCES

2.5.1 *Mineral aggregate resources* shall be protected for long-term use.

2.5.2 Protection of Long-Term Resource Supply

2.5.2.1 As much of the *mineral aggregate resources* as is realistically possible shall be made available as close to markets as possible.

Demonstration of need for *mineral aggregate resources*, including any type of supply/demand analysis, shall not be required, notwithstanding the availability, designation or licensing for extraction of *mineral aggregate resources* locally or elsewhere.

2.5.2.2 Extraction shall be undertaken in a manner which minimizes social and environmental impacts.

2.5.2.3 The conservation of *mineral aggregate resources* should be promoted by making provision for the recovery of these resources, wherever feasible.

2.5.2.4 *Mineral aggregate operations* shall be protected from *development* and activities that would preclude or hinder their expansion or continued use or which would be incompatible for reasons of public health, public safety or environmental impact. Existing *mineral aggregate operations* shall be permitted to continue without the need for official plan amendment, rezoning or development permit under the *Planning Act*. When a license for extraction or operation ceases to exist, policy 2.5.2.5 continues to apply.

2.5.2.5 In areas adjacent to or in known *deposits of mineral aggregate resources, development* and activities which would preclude or hinder the establishment of new operations or access to the resources shall only be permitted if:

- a) resource use would not be feasible; or
- b) the proposed land use or development serves a greater long-term public interest; and
- c) issues of public health, public safety and environmental impact are addressed.

2.5.3 Rehabilitation

2.5.3.1 Progressive and final rehabilitation shall be required to accommodate subsequent land uses, to promote land use compatibility, and to recognize the interim nature of extraction. Final rehabilitation shall take surrounding land use and approved land use designations into consideration.

2.5.3.2 In parts of the Province not designated under the *Aggregate Resources Act*, rehabilitation standards that are compatible with those under the Act should be adopted for extraction operations on private lands.

2.5.4 Extraction in Prime Agricultural Areas

2.5.4.1 In *prime agricultural areas*, on *prime agricultural land*, extraction of *mineral aggregate resources* is permitted as an interim use provided that rehabilitation of the site will be carried out so that substantially the same areas and same average soil quality for agriculture are restored.

On these *prime agricultural lands*, complete agricultural rehabilitation is not required if:

- a) there is a substantial quantity of *mineral aggregate resources* below the water table warranting extraction, or the depth of planned extraction in a quarry makes restoration of pre-extraction agricultural capability unfeasible;
- b) other alternatives have been considered by the applicant and found unsuitable. The consideration of other alternatives shall include resources in areas of Canada Land Inventory Class 4 to 7 soils, resources on lands identified as *designated growth areas*, and resources on *prime agricultural lands* where rehabilitation is feasible. Where no other alternatives are found, *prime agricultural lands* shall be protected in this order of priority: *specialty crop areas*, Canada Land Inventory Classes 1, 2 and 3; and
- c) agricultural rehabilitation in remaining areas is maximized.

2.5.5 Wayside Pits and Quarries, Portable Asphalt Plants and Portable Concrete Plants

2.5.5.1 *Wayside pits and quarries, portable asphalt plants and portable concrete plants* used on public authority contracts shall be permitted, without the need for an official plan amendment, rezoning, or development permit under the *Planning Act* in all areas, except those areas of existing development or particular environmental sensitivity which have been determined to be incompatible with extraction and associated activities.

2.6 CULTURAL HERITAGE AND ARCHAEOLOGY

2.6.1 *Significant built heritage resources and significant cultural heritage landscapes shall be conserved.*

2.6.2 *Development and site alteration shall only be permitted on lands containing archaeological resources or areas of archaeological potential if the significant archaeological resources have been conserved by removal and documentation, or by preservation on site. Where significant archaeological resources must be preserved on site, only development and site alteration which maintain the heritage integrity of the site may be permitted.*

2.6.3 *Development and site alteration may be permitted on adjacent lands to protected heritage property where the proposed development and site alteration has been evaluated and it has been demonstrated that the heritage attributes of the protected heritage property will be conserved.*

Mitigative measures and/or alternative development approaches may be required in order to conserve the *heritage attributes* of the *protected heritage property* affected by the adjacent *development* or *site alteration*.

3.0 PROTECTING PUBLIC HEALTH AND SAFETY

Ontario's long-term prosperity, environmental health and social well-being depend on reducing the potential for public cost or risk to Ontario's residents from natural or human-made hazards. Development shall be directed away from areas of natural or human-made hazards where there is an unacceptable risk to public health or safety or of property damage.

Accordingly:

3.1 NATURAL HAZARDS

3.1.1 Development shall generally be directed to areas outside of:

- a) *hazardous lands* adjacent to the shorelines of the *Great Lakes - St. Lawrence River System* and large inland lakes which are impacted by *flooding hazards*, *erosion hazards* and/or *dynamic beach hazards*;
- b) *hazardous lands* adjacent to river, stream and small inland lake systems which are impacted by *flooding hazards* and/or *erosion hazards*; and
- c) *hazardous sites*.

3.1.2 *Development and site alteration shall not be permitted within:*

- a) *the dynamic beach hazard*;
- b) *defined portions of the one hundred year flood level along connecting channels* (the St. Mary's, St. Clair, Detroit, Niagara and St. Lawrence Rivers);
- c) areas that would be rendered inaccessible to people and vehicles during times of *flooding hazards*, *erosion hazards* and/or *dynamic beach hazards*, unless it has been demonstrated that the site has safe access appropriate for the nature of the *development* and the natural hazard; and
- d) a *floodway* regardless of whether the area of inundation contains high points of land not subject to flooding.

3.1.3 Despite policy 3.1.2, *development* and *site alteration* may be permitted in certain areas identified in policy 3.1.2:

- a) in those exceptional situations where a *Special Policy Area* has been approved. The designation of a *Special Policy Area*, and any change or modification to the site-specific policies or boundaries applying to a *Special Policy Area*, must be approved by the Ministers of Municipal Affairs and Housing and Natural Resources prior to the approval authority approving such changes or modifications; or

- b) where the *development* is limited to uses which by their nature must locate within the *floodway*, including flood and/or erosion control works or minor additions or passive non-structural uses which do not affect flood flows.

3.1.4 *Development shall not be permitted to locate in hazardous lands and hazardous sites where the use is:*

- a) an institutional use associated with hospitals, nursing homes, pre-school, school nurseries, day care and schools, where there is a threat to the safe evacuation of the sick, the elderly, persons with disabilities or the young during an emergency as a result of flooding, failure of floodproofing measures or protection works, or erosion;
- b) an essential emergency service such as that provided by fire, police and ambulance stations and electrical substations, which would be impaired during an emergency as a result of flooding, the failure of floodproofing measures and/or protection works, and/or erosion; and
- c) uses associated with the disposal, manufacture, treatment or storage of *hazardous substances*.

3.1.5 Where the two zone concept for *flood plains* is applied, *development* and *site alteration* may be permitted in the *flood fringe*, subject to appropriate floodproofing to the *flooding hazard* elevation or another *flooding hazard* standard approved by the Minister of Natural Resources.

3.1.6 Further to policy 3.1.5, and except as prohibited in policies 3.1.2 and 3.1.4, *development* and *site alteration* may be permitted in those portions of *hazardous lands* and *hazardous sites* where the effects and risk to public safety are minor so as to be managed or mitigated in accordance with provincial standards, as determined by the demonstration and achievement of all of the following:

- a) *development* and *site alteration* is carried out in accordance with *floodproofing standards*, *protection works standards*, and *access standards*;
- b) vehicles and people have a way of safely entering and exiting the area during times of flooding, erosion and other emergencies;
- c) new hazards are not created and existing hazards are not aggravated; and
- d) no adverse environmental impacts will result.

3.2 HUMAN-MADE HAZARDS

3.2.1 Development on, abutting or adjacent to lands affected by *mine hazards*; *oil, gas and salt hazards*; or former *mineral mining operations*, *mineral aggregate operations* or *petroleum resource operations* may be permitted only if rehabilitation measures to address and mitigate known or suspected hazards are under-way or have been completed.

3.2.2 Contaminated sites shall be remediated as necessary prior to any activity on the site associated with the proposed use such that there will be no *adverse effects*.

4.0 IMPLEMENTATION AND INTERPRETATION

4.1 This Provincial Policy Statement applies to all applications, matters or proceedings commenced on or after March 1, 2005.

4.2 In accordance with Section 3 of the *Planning Act*, as amended by the *Strong Communities (Planning Amendment) Act, 2004*, a decision of the council of a municipality, a local board, a planning board, a minister of the Crown and a ministry, board, commission or agency of the government, including the Municipal Board, in respect of the exercise of any authority that affects a planning matter, "shall be consistent with" this Provincial Policy Statement.

Comments, submissions or advice that affect a planning matter that are provided by the council of a municipality, a local board, a planning board, a minister or ministry, board, commission or agency of the government "shall be consistent with" this Provincial Policy Statement.

- 4.3 This Provincial Policy Statement shall be read in its entirety and all relevant policies are to be applied to each situation.
- 4.4 In implementing the Provincial Policy Statement, the Minister of Municipal Affairs and Housing may take into account other considerations when making decisions to support strong communities, a clean and healthy environment and the economic vitality of the Province.
- 4.5 The official plan is the most important vehicle for implementation of this Provincial Policy Statement.

Comprehensive, integrated and long-term planning is best achieved through municipal official plans. Municipal official plans shall identify provincial interests and set out appropriate land use designations and policies. Municipal official plans should also coordinate cross-boundary matters to complement the actions of other planning authorities and promote mutually beneficial solutions.

Municipal official plans shall provide clear, reasonable and attainable policies to protect provincial interests and direct development to suitable areas.

In order to protect provincial interests, planning authorities shall keep their official plans up-to-date with this Provincial Policy Statement. The policies of this Provincial Policy Statement continue to apply after adoption and approval of a municipal official plan.

- 4.6 The policies of this Provincial Policy Statement represent minimum standards. This Provincial Policy Statement does not prevent planning authorities and decision-makers from going beyond the minimum standards established in specific policies, unless doing so would conflict with any policy of this Provincial Policy Statement.
- 4.7 A wide range of legislation and regulations may apply to decisions with respect to *Planning Act* applications. In some cases, a *Planning Act* proposal may also require approval under other legislation or regulation.
- 4.8 In addition to land use approvals under the *Planning Act*, infrastructure may also require approval under other legislation and regulations, including the *Environmental Assessment Act*; the *Canadian Environmental Assessment Act, 1992*; the *Environmental Protection Act*; the *Ontario Energy Board Act, 1998*; the *Ontario Water Resources Act*; the *Conservation Authorities Act*; the *Ontario Heritage Act*; and the *Safe Drinking Water Act, 2002*. An environmental assessment process may be applied to new infrastructure and modifications to existing infrastructure under applicable legislation.
- 4.9 Provincial plans shall take precedence over policies in this Provincial Policy Statement to the extent of any conflict. Examples of these are plans created under the *Niagara Escarpment Planning and Development Act* and the *Oak Ridges Moraine Conservation Act, 2001*.
- 4.10 The Province, in consultation with municipalities, other public bodies and stakeholders shall identify performance indicators for measuring the effectiveness of some or all of the policies. The Province shall monitor their implementation, including reviewing performance indicators concurrent with any review of this Provincial Policy Statement.
- 4.11 Municipalities are encouraged to establish performance indicators to monitor the implementation of the policies in their official plans.

(5) A director may give an approval under clause (3) (b) only if of the opinion that it is no longer necessary for the animal to continue to be detained or seized so that,

(a) the animal can be observed, sampled, tested or subject to other assessment to determine if the animal is contaminated; or

(b) the animal may be used as evidence in any proceeding under the Act and this Regulation.

(6) A director or a regional veterinarian may attach conditions to the approval that are relevant to the form of euthanasia or disposal of the animal's remains and the operator shall comply with the conditions.

(7) An operator who condemns a food animal in accordance with an approval given under subsection (3) shall,

(a) humanely euthanize the animal in accordance with the applicable conditions of the approval; and

(2) The operator of a slaughter plant shall ensure that no person slaughters a food animal at the plant except in accordance with this Part and the conditions, if any, of its approval for slaughter.

(3) No person shall slaughter a food animal at a place other than a slaughter plant operated by a licensee or at a registered establishment as defined in the *Meat Inspection Act* (Canada).

Ante mortem inspection

68. (1) The operator of a slaughter plant shall ensure that, before a food animal is slaughtered at the plant, it is presented to an inspector for an ante mortem inspection and it receives approval under this Part for slaughter.

(2) The inspector to whom a food animal is presented under subsection (1) shall conduct the ante mortem inspection in a location at the plant that is acceptable to the inspector.

(3) If the condition of a food animal would likely cause contamination during the dressing of its carcass, the operator of a slaughter plant shall ensure that the animal is not presented for slaughter.

Response of non-veterinary inspector

69. (1) An inspector who is not a veterinary inspector, who conducts an ante mortem inspection of a food animal and who does not take the action described in clauses (2) (a) and (b) shall approve the animal for slaughter.

(2) If it appears to an inspector, who is not a veterinary inspector, on an ante mortem inspection of a food animal at a slaughter plant that the animal is not healthy or shows a deviation from normal behaviour or appearance or if the inspector has any reason to believe that the animal is contaminated or otherwise unfit for slaughter, the inspector shall,

(4) A regional veterinarian may direct an inspector who is not a veterinary inspector and who is conducting an ante mortem inspection of a food animal not to take the action described in clauses (2) (a) and (b) if,

- (a) the animal is accompanied by a certificate for direct transport to slaughter issued by a veterinarian under the *Livestock and Livestock Products Act*; or
 - (b) the animal has deviations from normal behaviour or appearance that, in the opinion of the regional veterinarian, are not likely to cause the animal to be unsafe for use as food.
- (5) A regional veterinarian who makes a direction under subsection (4) shall approve the animal for slaughter.

(6) The regional veterinarian may attach conditions to the approval, including requiring that the animal be segregated from other animals before slaughter and undergo a post mortem inspection by a veterinary inspector, if the conditions are relevant to ensuring that the animal will be safe for use as food.

Response of veterinary inspector

70. (1) If a food animal at a slaughter plant is presented under subsection 68 (1) to a veterinary inspector for an ante mortem inspection or is referred to a veterinary inspector under subsection 69 (2) and if the veterinary inspector determines on an ante mortem inspection that the animal is contaminated or in an otherwise unsatisfactory condition for slaughter, the veterinary inspector shall, subject to section 71,

- (a) order that the operator of the plant condemn and humanely euthanize the animal at the operator's expense, subject to the conditions that the veterinary inspector imposes if they are relevant to the euthanasia;
- (b) order that the operator of the plant hold the animal and keep it apart from other animals for rest, treatment or further observation, sampling, testing or other assessment on the conditions that the veterinary inspector directs; or

- (4) At any time after making an order described in clause (1) (b), the veterinary inspector may,
 - (a) if of the opinion that the animal is contaminated or in an otherwise unsatisfactory condition for slaughter, order that the operator of the plant condemn and humanely euthanize the animal at the operator's expense, subject to the conditions that the veterinary inspector imposes if they are relevant to the euthanasia;
 - (b) order that the operator of the plant hold the animal and keep it apart from other animals for rest, treatment or further observation, sampling, testing or other assessment on the conditions that the veterinary inspector directs; or
 - (c) approve the animal for slaughter, subject to the conditions that the veterinary inspector imposes, including conditions requiring that the animal be segregated from other animals before slaughter and undergo a post mortem inspection by a veterinary inspector, if the conditions are relevant to ensuring that the animal will be safe for use as food.
- (5) The operator shall comply with an order made under subsection (4) and the conditions, if any, of the order.
- (6) If a veterinary inspector makes an order under clause (1) (a) or (4) (a), the operator shall,

 - (b) as a result of tests performed in respect of a food animal mentioned in clause (a), the veterinary inspector is of the opinion that the animal or any other food animal in the same shipment of animals delivered to the plant is contaminated or in an otherwise unsatisfactory condition for slaughter.
- (2) The veterinary inspector may, without performing an ante mortem inspection of any of the animals mentioned in subsection (1), order the operator of the plant to condemn and humanely euthanize any or all of the animals mentioned in that subsection at the operator's expense, subject to the conditions that the veterinary inspector imposes if they are relevant to the euthanasia.

Identification of food animal

72. (1) If a food animal at a slaughter plant is presented under subsection 68 (1) to an inspector for an ante mortem inspection or is referred to a veterinary inspector under subsection 69 (2), the inspector may require that the operator identify the animal through identifying marks or devices and corresponding records in a manner acceptable to the inspector and maintain the identification for the time that the inspector specifies.

(2) An inspector who orders the operator of a slaughter plant to hold a food animal under clause 69 (2) (a), 70 (1) (b) or (4) (b) may require the operator to identify the carcass and any parts of the carcass of the animal through identifying marks, tags or devices and corresponding records in a manner acceptable to the inspector and to maintain the identification for the time that the inspector specifies.

(3) The operator shall comply with the requirements imposed under subsections (1) and (2).

Taking animals into killing room

73. (1) Subject to subsection (3), no person shall take a food animal into the killing room of a slaughter plant unless the animal is accompanied in the killing room by a record of all of the animals sent to the killing room in the same lot as the animal.

(2) The record shall be in a form acceptable to a director and shall contain the following information:

1. The names of all of the owners or sellers of the animals in the lot.
2. For each owner or seller of animals in the lot, the species and classes of the owner's or seller's animals in the lot and the number of animals of each species and class.

 - iii. confirmation by an inspector that an ante mortem inspection of the animal has been completed and the animal has been approved for slaughter in accordance with this Part.

(3) A food animal that has not received ante mortem inspection and has not been approved for slaughter may be taken into the killing room of a slaughter plant for the purpose of euthanizing the animal if a director has approved the entry of the animal into the plant under section 63 so that the animal can be euthanized.

Time for slaughter

74. (1) Subject to subsection (3), a food animal shall be slaughtered within 24 hours of being approved for slaughter.

(2) A food animal that is not slaughtered within 24 hours of being approved for slaughter as required by subsection (1) shall not be slaughtered unless it is first presented to an inspector for a further ante mortem inspection and is again approved for slaughter in accordance with this Part.

(3) Food animals that are rabbits and birds, other than ratites, shall be slaughtered as soon as possible after being received at a slaughter plant.

Method of slaughter

75. (1) No person shall slaughter a food animal at a slaughter plant in a way that subjects it to avoidable pain or distress.

(2) Subject to subsection (8), every food animal that is slaughtered at a slaughter plant shall be,

- (a) stunned and rendered unconscious by a method specified in subsection (3) and in a manner that ensures that the animal does not regain consciousness before death;
- (b) adequately restrained during stunning;
- (c) stunned and rendered unconscious as required by clause (a) before being wholly or partially hoisted or suspended for the purpose of slaughter unless the animal is a rabbit or a bird, other than a ratite, and is suspended before stunning and bled immediately after stunning; and
- (d) bled in a manner that produces rapid exsanguination.

(3) One of the following methods shall be used to stun and render a food animal unconscious for the purposes of clause (2) (a):

1. Delivering a blow to the head by means of a mechanical penetrating device that causes immediate loss of consciousness.
2. Exposure to carbon dioxide gas in a manner that causes rapid loss of consciousness.

3. Applying an electrical current in a manner that causes immediate loss of consciousness.
4. Using a firearm if a regional veterinarian approves the use under subsection (4).
5. Any other method approved by a regional veterinarian that causes immediate loss of consciousness.

(4) A regional veterinarian may authorize the use of a firearm to render a food animal unconscious if of the opinion that it is necessary to do so to alleviate the animal's acute suffering or distress or to protect the safety of any person at the plant.

(5) In subsection (4),

"firearm" includes a firearm within the meaning of the *Criminal Code* (Canada) and the *Firearms Act* (Canada) and any other shooting device that is designed for the slaughtering of animals.

(6) An operator who is authorized to use a firearm under subsection (4) shall ensure that the firearm is registered and stored in accordance with all applicable laws.

(7) No person shall use any equipment or instrument to restrain, slaughter or render a food animal unconscious at a plant unless,

- (a) the person is competent and physically able to do so without subjecting the animal to avoidable pain or distress; and
- (b) the condition of the equipment or instrument and the circumstances under which it is used will not subject the animal to avoidable pain or distress.

(8) Clauses (2) (a), (b) and (c) do not apply to a person who ritually slaughters a food animal at a slaughter plant in accordance with religious practice and who,

- (a) ensures that the animal is adequately restrained during slaughter;
- (b) slaughters the animal by means of a cut that rapidly, simultaneously and completely severs the jugular veins and carotid arteries, in a manner that causes the animal to lose consciousness immediately and results in rapid exsanguination;
- (c) ensures the animal is unconscious before it is wholly or partially hoisted or suspended for the purpose of slaughter unless the animal is a rabbit or a bird, other than a ratite, and is bled immediately after being suspended; and
- (d) possesses the skill necessary to carry out the slaughter in a humane manner.

(9) The operator of a slaughter plant shall ensure that every food animal that is slaughtered at the plant is slaughtered under conditions that will facilitate the hygienic production of meat products.

DRESSING AND PARTIAL DRESSING OF CARCASSES

Dressing

76. (1) The operator of a slaughter plant shall ensure that, subject to sections 77 and 78, the carcass of every food animal slaughtered at the plant is dressed promptly after slaughter so as to prevent deterioration of the carcass and in a manner that permits effective post mortem inspection.

(2) The operator shall ensure that no carcass of a pig is eviscerated at the plant unless all of the hair, scurf and toenails have been removed from its surface and the carcass has been cleaned and washed prior to evisceration.

(3) The operator shall ensure that the esophagus and rectum of a cattle carcass is effectively tied off or clamped in a manner that prevents contamination, at the plant during dressing, of the carcass, the utensils used for dressing and food contact surfaces.

(4) If during dressing, a carcass or part of a carcass of a food animal is found to contain a blood clot, bone splinter, or extraneous matter, the operator shall ensure that the blood clot, bone splinter or extraneous matter is removed, condemned and disposed of in accordance with section 91.

Partial dressing

77. (1) A regional veterinarian may authorize the operator of a slaughter plant in writing to partially dress a carcass of a food animal slaughtered at the plant and to ship the partially dressed carcass from the plant in that form if,

- (a) the food animal from which the carcass is derived received ante mortem inspection, was approved for slaughter and was slaughtered in accordance with this Part;
- (b) one of the following conditions is met:
 - (i) the carcass is sufficiently dressed to allow an effective post mortem inspection and an inspector, on such an inspection, has approved the carcass for use as food,
 - (ii) in the case of a carcass of a bird from a flock of birds, other than ratites, the carcass is not sufficiently dressed to allow an effective post mortem inspection but an inspector, on such an inspection of a representative sample of

fully eviscerated carcasses from the flock, has approved the carcasses of the representative sample for use as food; and

- (c) the regional veterinarian is of the opinion that the partial dressing of the carcass is unlikely to result in contamination of the premises, facilities or equipment of the plant or carcasses, parts of carcasses or meat products at the plant.
- (2) The regional veterinarian may attach conditions to an authorization issued under subsection (1) that are relevant to the dressing of carcasses, including conditions regarding dressing procedures that are to be followed for partial dressing of the carcass, and the operator shall comply with the conditions.
- (3) The operator shall ensure that no partially dressed carcass with the hide on is eviscerated at the plant unless,
 - (a) the hide is washed and cleaned prior to evisceration; and
 - (b) the carcass is kept in a separate cooler, subject to subsection (4).
- (4) A carcass is not required to be kept in a separate cooler if,
 - (a) the operator has established written procedures to prevent having the hide of the carcass contaminate carcasses, parts of carcasses, meat products and food contact surfaces at the plant;
 - (b) the regional veterinarian has approved the procedures mentioned in clause (a); and
 - (c) the operator ensures that the procedures mentioned in clause (a) are effectively implemented at the plant.
- (5) If on a post mortem inspection, a partially dressed carcass with the hide on shows evidence of disease or if the hide shows evidence of disease or contamination, the operator shall ensure that the hide is immediately removed from the carcass.

Transfer of carcasses

78. (1) If the carcass of a bird, other than a ratite, has received an ante mortem inspection and has been slaughtered at a slaughter plant operated by a licensee, it may be received, eviscerated and undergo a post mortem inspection at another slaughter plant operated by a licensee if it has a tag attached to it at the first plant after the slaughter indicating that it received an ante mortem inspection and approval for slaughter.

(2) If the carcass that is received at the second slaughter plant described in subsection (1) does not have the tag attached to it as that subsection requires, the operator of the plant shall,

- (a) ensure that the carcass is not eviscerated and does not undergo a post mortem inspection at the plant; and
- (b) condemn the carcass and dispose of the animal's remains in a manner acceptable to an inspector.
- (3) If the operator does not comply with clause (2) (b), an inspector may, without a hearing,
 - (a) seize the carcass;
 - (b) condemn the carcass and dispose of the animal's remains or arrange for the condemnation and disposal of remains; and
 - (c) order the operator to pay for the condemnation and disposal of remains.
- (4) The operator shall comply with an order of the inspector made under clause (3) (c).

Operating procedures

79. The operator of a slaughter plant shall,

- (a) ensure that any process used at the plant in the slaughter of food animals or the dressing of carcasses from food animals is designed and implemented to ensure a safe meat product;
- (b) implement and maintain control procedures at the plant to identify, quantify, eliminate, minimize or control hazards in the slaughter and dressing process that are critical to ensuring the production of a safe meat product;
- (c) monitor the processes and control procedures mentioned in clauses (a) and (b);
- (d) record the result of the monitoring, including any deviations from the processes and control procedures mentioned in clauses (a) and (b);
- (e) evaluate and verify through observation, sampling and testing procedures, the effectiveness of the control procedures mentioned in clause (b) affecting the safety of meat products; and
- (f) ensure that the records mentioned in clause (d) are kept at the slaughter plant for at least one year.

POST MORTEM INSPECTION AND DISPOSITION OF CARCASSES

Post mortem inspection

80. (1) The operator of a slaughter plant shall ensure that every carcass of a food animal slaughtered at the plant and every part of such carcass that is intended for human consumption is presented to an inspector for a post mortem inspection and that an inspector inspects every such carcass and part of a carcass.

(2) The operator shall ensure that, before a post mortem inspection is completed, every carcass of a food animal slaughtered at the plant and every part removed from such carcass that is intended for human consumption, including blood removed from the carcass for processing or use for food, is identified by markings, tags or other devices and corresponding records in a manner acceptable to an inspector.

(3) The operator shall ensure that the identification effectively indicates the carcass of the food animal and is maintained for as long as an inspector requires while the carcass or the part of the carcass, as the case may be, is at the plant.

Response of inspector

81. (1) If it appears to an inspector, who is not a veterinary inspector, on a post mortem inspection of a carcass or a part of a carcass of a food animal at a slaughter plant that the carcass or the part of the carcass shows no deviation from normal appearance or evidence of abnormal condition and if the inspector has no reason to believe the carcass or the part of the carcass is contaminated or otherwise unfit for human consumption, the inspector shall approve the carcass or the part of the carcass for use as food.

(2) If the inspector finds that the carcass or the part of the carcass shows a deviation from normal appearance or evidence of abnormal condition or if the inspector has reason to believe the carcass or the part of the carcass is contaminated or otherwise unfit for human consumption, the inspector shall,

- (a) order the operator of the plant to hold the carcass and the parts of the carcass; and
- (b) refer them to a veterinary inspector for another post mortem inspection or to a regional veterinarian for disposition.

(3) If the inspector finds that the carcass or the part of a carcass is subject only to deviations from normal appearance that, in the opinion of a regional veterinarian, are not likely to cause it to be unsafe for use as food, the inspector may, instead of taking the action described in clauses (2) (a) and (b),

- (a) approve the carcass or the part of the carcass for use as food; or
- (b) order the operator to hold the carcass or the part of the carcass for further inspection, sampling, testing or other assessment on the terms that the inspector directs.

(4) If the inspector orders the operator to hold a carcass or a part of a carcass under clause (3) (b), the inspector may at any time,

- (a) approve the carcass or the part of the carcass for use as food;
- (b) order the operator to hold the carcass or the part of the carcass for further inspection, sampling, testing or other assessment on the terms that the inspector directs; or
- (c) refer the carcass or the part of the carcass to a veterinary inspector for another post mortem inspection or to a regional veterinarian for disposition.

(5) If the inspector finds that the carcass or the part of a carcass is subject to deviations from normal appearance that, in the opinion of a regional veterinarian, would likely cause it to be unsafe for use as food, the inspector may, instead of taking the action described in clauses (2) (a) and (b),

- (a) order the operator to condemn the carcass or the part of the carcass and to dispose of the animal's remains in accordance with section 91; or
- (b) order the operator to hold the carcass or the part of the carcass for further inspection, sampling, testing or other assessment on the terms that the inspector directs.

(6) If the inspector orders the operator to hold a carcass or a part of a carcass under clause (5) (b), the inspector may at any time,

- (a) order the operator to condemn the carcass or the part of the carcass and to dispose of the animal's remains in accordance with section 91;
- (b) order the operator to hold the carcass or the part of the carcass for further inspection, sampling, testing or other assessment on the terms that the inspector directs; or
- (c) refer the carcass or the part of the carcass to a veterinary inspector for another post mortem inspection or to a regional veterinarian for disposition.

(7) If the inspector, under clause (2) (b), (4) (c) or (6) (c), refers a carcass or a part of a carcass of a food animal to a veterinary inspector for another post mortem inspection or to a regional veterinarian for disposition, the veterinary inspector or the regional veterinarian may,

- (a) approve the carcass or the part of the carcass for use as food;
- (b) order the operator to hold the carcass or the part of the carcass for inspection, sampling, testing or other assessment on the terms that the veterinary inspector or the regional veterinarian directs; or
- (c) if the veterinary inspector or the regional veterinarian is of the opinion that the carcass or the part of the carcass is affected by any disease, condition or contamination that may render it unfit for use as food, order the operator to condemn the carcass or the part of the carcass and to dispose of the animal's remains in accordance with section 91.

(8) An inspector who makes an order for condemnation under clause (5) (a) or (6) (a) or a veterinary inspector or regional veterinarian who makes an order for condemnation under clause (7) (c) may attach conditions to the order if they are relevant to the condemnation.

(9) The operator shall comply with an order made under this section and the conditions, if any, of the order.

(10) If the operator does not comply with an order for condemnation made under clause (5) (a), (6) (a) or (7) (c), an inspector may, without a hearing,

- (a) seize the carcass or part of the carcass that is the subject of the order;
- (b) condemn the carcass or part of the carcass that is the subject of the order and dispose of the animal's remains or arrange for the condemnation and disposal of remains; and
- (c) order the operator to pay for the condemnation and disposal of remains.

(11) The operator shall comply with an order of the inspector made under clause (10) (c).

Voluntary condemnation

82. (1) The operator of a meat plant may voluntarily condemn a carcass or part of a carcass of a food animal at the plant, if an inspector does not order the operator, under this Part, to hold the carcass or the part of the carcass and does not detain or seize it under the Act.

(2) An operator who condemns a carcass or part of a carcass under subsection (1) shall dispose of it in accordance with section 91.

(3) The operator of a slaughter plant may voluntarily condemn,

- (a) a carcass or a part of a carcass of a food animal at the plant that an inspector orders the operator, under this Part, to hold only if a regional veterinarian has given prior approval under subsection (4); or
- (b) a carcass or a part of a carcass of a food animal at the plant that an inspector detains or seizes under the Act only if a director has given prior approval under subsection (5).

(4) A regional veterinarian may give an approval under clause (3) (a) only if of the opinion that it is no longer necessary for the operator to hold the carcass or the part of the carcass for further inspection, sampling, testing or other assessment to determine if it is contaminated.

(5) A director may give an approval under clause (3) (b) only if of the opinion that it is no longer necessary for the carcass or the part of the carcass to continue to be detained or seized so that,

- (a) it can be further inspected, sampled, tested or subject to other assessment to determine if it is contaminated; or
- (b) it may be used as evidence in any proceeding under the Act and this Regulation.

(6) A director or a regional veterinarian may attach conditions to the approval that are relevant to the condemnation of the carcass or the part of the carcass or the disposal of the animal's remains and the operator shall comply with the conditions.

(7) An operator who condemns a carcass or a part of a carcass in accordance with an approval given under subsection (3) shall, in the presence of an inspector, dispose of it in accordance with section 91 and the applicable conditions of the approval.

Cooling and refrigeration

83. (1) Subject to subsections (8) and (10), if a carcass or a part of a carcass at a slaughter plant receives approval under this Part for use as food, the operator of the plant shall ensure that, immediately after the approval is given, the carcass or the part of the carcass is cooled in accordance with subsections (2) to (4) and is kept refrigerated or frozen in accordance with subsection (6).

(2) The cooling shall be continuous.

(3) The cooling shall be performed so that,

- (a) the surface temperature of a carcass or a part of a carcass of a mammal or a ratite reaches 7 degrees Celsius or less within 24 hours after the approval is given; and
 - (b) the internal temperature of the warmest part of the carcass or the part of the carcass reaches 4 degrees Celsius or less as soon as possible after the time that the cooling described in clause (a) occurs.
- (4) Meat and meat by-products from a carcass shall be cooled to a temperature of 4 degrees Celsius or less and shall not be permitted to remain in any place at a slaughter plant that has a temperature of more than 4 degrees Celsius.
- (5) The operator of a meat plant shall ensure that, before a carcass is cut at the plant, the internal temperature of the warmest part of the carcass is 4 degrees Celsius or less.
- (6) Subject to subsection (7), a carcass, a part of a carcass or a meat product at a meat plant, that is not a shelf stable meat product, shall be kept refrigerated at an internal temperature of 4 degrees Celsius or less or frozen at an internal temperature of -18 degrees Celsius or less while it is at the meat plant.
- (7) Subsection (6) does not apply to a meat product during processing if the processing involves cooking, thermal processing or any other processing procedure requiring the application of heat to the product.
- (8) If the operator of a slaughter plant is unable to comply with subsection (1), (2), (3), (5) or (6) because of an emergency, a regional veterinarian may direct in writing that any of those subsections do not apply to a carcass, a part of a carcass or a meat product at the plant for the time and on the conditions that the regional veterinarian specifies.
- (9) If the operator of a freestanding meat plant is unable to comply with subsection (5) or (6) because of an emergency, a regional veterinarian may direct in writing that any of those subsections do not apply to a meat product at the plant for the time and on the conditions that the regional veterinarian specifies.
- (10) A regional veterinarian may direct in writing that any of subsections (1), (2), (3), (4), (5) and (6) do not apply to a carcass, a part of a carcass or a meat product derived from a food animal at a slaughter plant if,
- (a) the animal was slaughtered in accordance with this Part and with religious practice and ritual; and
 - (b) the operator of the plant will sell or distribute the carcass, the part of the carcass or the meat product directly to the consumers of the carcass, the part of the carcass or the meat product.

ENTRY OF CARCASS INTO MEAT PLANT

Entry of carcass into meat plant

84. (1) Subject to subsection (2), no person shall permit the entry into a meat plant of a carcass or a part of a carcass unless it is derived from a food animal and one of the following conditions are met:

- 1. It has received a post mortem inspection at a meat plant in accordance with this Part and approval under this Part for use as food.
 - 2. It has been inspected at a registered establishment as defined in the *Meat Inspection Act* (Canada) and approved for use as food in accordance with that Act and the regulations made under it.

10. (1) Sous réserve des paragraphes 49 (2) et 50 (2), les conducteurs sont acheminés, en suivant le trajet le plus direct possible, sur les toits et le long des faîtes et des parapets de façon à relier entre elles les bornes aériennes et, en suivant le trajet le plus direct possible, sur les avant-toits vers les meilleurs emplacements de prise au sol. Toutefois, lorsque la nature d'un toit ou sa construction rend la pose d'accessoires sur le toit difficile ou déconseillée, les conducteurs peuvent être acheminés sur le bois de garnissage parallèle au toit et une connexion est faite près de l'avant-toit entre la gouttière métallique et le conducteur, et, dans le cas des toits métalliques, entre l'avant-toit métallique et le conducteur.

(2) Les bâtiments et les structures, à l'exception des objets effilés, tels les mâts et les silos qui n'ont pas besoin de plus d'une prise de terre en vertu du paragraphe 53 (3), sont munis d'au moins deux conducteurs de descente.

(3) Sur les toits plats, les conducteurs sont acheminés à moins de deux pieds du bord du toit ou sur les parapets. Toutefois, les conducteurs ne sont pas requis sur la partie du toit plat des lucarnes située à moins de deux pieds des avant-toits, si ceux-ci ont moins de 50 pieds de longueur.

(4) Sur les toits plats, en plus des conducteurs acheminés à moins de deux pieds du bord du toit ou sur les parapets, d'autres conducteurs sont acheminés en parallèle sur le toit de façon que l'intervalle qui les sépare ne dépasse pas 50 pieds :

Toutefois, dans le cas des structures, notamment des élévateurs à grains, qui subissent une déformation physique au cours de chaque cycle de chargement et de déchargement, les conducteurs doivent avoir assez de flexibilité pour éviter toute rupture.
13. Les conducteurs sont acheminés de façon qu'il n'y ait pas, dans leur parcours vers une ou plusieurs prises de terre, une remontée totale de plus de 10 pouces entre deux points de ceux-ci. Dans le cas des conducteurs à bout mort, la remontée totale ne doit pas dépasser six pouces. En aucun cas la remontée ne doit dépasser un pouce sur une distance de deux pouces mesurée sur un plan horizontal.

Si possible, les conducteurs ne doivent pas être situés à moins de six pieds d'objets métalliques intérieurs, notamment une stalle, un montant, les rails d'un convoyeur à fumier, un tuyau, un poteau, une poutre, un réservoir d'eau, une cuisinière ou une fournaise. Toutefois, si le conducteur est situé à moins de six pieds de l'objet, il y est connecté de la façon prescrite à l'article 45.
15. Si le conducteur ne peut être acheminé le long d'un parcours en ligne droite à cause d'un obstacle, notamment une coupole ou un ventilateur, il est acheminé horizontalement autour de l'obstacle. Si, en raison de sa dimension ou de sa forme, l'obstacle requiert plus d'une borne aérienne, le conducteur est aussi acheminé par-dessus l'obstacle.

(3) Les tuyaux de descente et les masses métalliques qui sont connectés à des conducteurs, à des toitures métalliques ou à du bardage métallique sont connectés à des prises de terre indépendantes au moyen d'un câble ou d'un feuillard de cuivre de calibre 17 au moins ou d'aluminium de calibre 14 au moins. La largeur des feuillards ne doit pas être inférieure à un pouce.

(4) Les raccords et les méthodes utilisées pour relier les conducteurs aux objets métalliques doivent assurer en permanence un contact étroit entre le conducteur et l'objet métallique.

(5) Les conducteurs utilisés pour mettre à la terre les masses métalliques visées aux articles 42 à 47 sont acheminés, sur toute leur longueur, sur un plan horizontal ou descendant à partir des masses métalliques :

- a) sous réserve de l'article 13;

- d) les supports de borne aérienne en aluminium sont attachés aux toits en cuivre.

(8) Du fer galvanisé de calibre 28 au moins sert de séparateur entre le cuivre et l'aluminium dans les cas suivants :

- a) les bornes aériennes en cuivre sont attachées aux toits en aluminium;
- b) les bornes aériennes en aluminium sont attachées aux toits en cuivre;
- c) un système est mis à la terre en attachant les conducteurs en cuivre au toit en aluminium au niveau de l'avant-toit ou du bardage;

51. (1) Les masses métalliques se trouvant à l'intérieur des bâtiments et des structures à toiture métallique et à revêtement métallique, se trouvant sur ceux-ci ou faisant saillie de ceux-ci sont connectées, reliées et mises à la terre de la façon prescrite aux articles 42 à 47. Au lieu d'être connectées aux conducteurs, elles peuvent toutefois être connectées aux toits métalliques ou au bardage métallique.

(2) Toutes les parties des toits métalliques et du bardage métallique sont mises à la masse et mises à la terre. Toutefois, si ces parties se trouvent à plus de six pieds les unes des autres, elles peuvent être mises à la terre indépendamment.

STRUCTURES DIVERSES

52. Les mâts, les pylônes de transmission pour la radio et la télévision, les pylônes de réseau électrique, les flèches d'église et les cheminées d'usine peuvent être équipés d'un système indépendant de la structure dont ils font partie ou sur laquelle ils sont construits. Toutefois, si la structure est elle-même équipée d'un système, les deux systèmes sont reliés.

53. (1) Pour l'application de la Loi, un silo fait partie d'un bâtiment lorsque le silo, selon le cas :

- a) est situé à moins de quatre pieds du bâtiment et se prolonge au-dessus du niveau du toit adjacent;
- b) est situé à moins de huit pieds du bâtiment, a un mur ou un toit fabriqué en totalité ou en partie de matériaux combustibles et se prolonge au-dessus du niveau du toit adjacent.

(2) Les bornes aériennes sont installées sur les silos de la façon suivante :

- 2. Sur un toit en dos d'âne et sur un toit muni de lucarnes, les bornes aériennes sont installées de la façon prescrite à l'article 26.
- 3. Sur un silo à ciel ouvert, au moins deux bornes aériennes sont installées; elles sont espacées d'au plus 25 pieds, en mesurant la distance le long de la surface extérieure du mur, et reliées au moyen de câbles ou de feuillards.

(3) Les conducteurs installés sur les silos peuvent être munis de prises de terre distinctes ou être connectés au conducteur de la structure ou du bâtiment adjacent, ou les deux. Si le diamètre extérieur du silo est supérieur à 14 pieds ou si le silo se prolonge à plus de quatre pieds au-dessus du point le plus rapproché du niveau du toit adjacent, le silo est muni d'au moins deux prises de terre.

54. Pour l'application de la Loi, une annexe fait partie du bâtiment ou de la structure, sauf si, selon le cas :

- a) elle a au plus huit pieds de hauteur, y compris les cheminées, les tuyaux d'aération et autres saillies, à l'extérieur d'un cône de protection;
- b) sa hauteur plus la distance sur laquelle elle se prolonge à partir de la structure ou du bâtiment principal ne dépassent pas la hauteur du mur attenant de ces derniers;
- c) elle se trouve entièrement à l'intérieur d'un cône de protection.

55. (1) Les fils métalliques, notamment les fils de clôture, les cordes à linge métalliques et les fils de hauban métalliques sont déconnectés ou isolés du bâtiment ou de la structure ou sont mis à la terre.

(2) Lorsqu'un fil métallique est connecté à un conducteur sur un bâtiment ou une structure, il est aussi pourvu d'une prise de terre indépendante à l'extrémité éloignée du bâtiment ou de la structure.

(3) Les prises de terre indépendantes des fils métalliques sont faites de fil de cuivre de calibre 10 au moins et elles sont enfouies à une profondeur de six pieds ou étendues dans une tranchée de six pieds, ou son équivalent.

(4) Les connexions des fils métalliques aux conducteurs ou aux prises de terre sont faites de fil de cuivre de calibre 10 au moins ou de fil d'aluminium de calibre 8 au moins, ou leur équivalent.

56. (1) Le cachet mentionné au paragraphe 12 (2) de la Loi est un disque métallique traversé par un fil de cuivre en boucle et attaché à tous les conducteurs de descente.

(Statutory Conditions — Automobile Insurance)

Note: Ontario Regulation 777/93 has previously been amended. Those amendments are listed in the Table of Regulations Legislative History Overview which can be found at www.e-laws.gov.on.ca.

1. (1) Subcondition (1) of statutory condition 11 of the Schedule to Ontario Regulation 777/93 is revoked and the following substituted:

Termination

(1) Subject to section 12 of the *Compulsory Automobile Insurance Act* and sections 237 and 238 of the *Insurance Act*, the insurer may, by registered mail or personal delivery, give to the insured a notice of termination of the contract.

(1.1) If the insurer gives a notice of termination under subcondition (1) for a reason other than non-payment of the whole or any part of the premium due under the contract or of any charge under any agreement ancillary to the contract or if the

insurer gives a notice of termination in accordance with subcondition (1.7), the notice of termination shall terminate the contract no earlier than,

- (a) the 15th day after the insurer gives the notice, if the insurer gives the notice by registered mail; or
- (b) the fifth day after the insurer gives the notice, if the insurer gives the notice by personal delivery.

(1.2) Subject to subcondition (1.7), if the insurer gives a notice of termination under subcondition (1) for the reason of non-payment of the whole or any part of the premium due under the contract or of any charge under any agreement ancillary to the contract, the notice of termination shall comply with subcondition (1.3) and shall specify a day for the termination of the contract that is no earlier than,

- (a) the 30th day after the insurer gives the notice, if the insurer gives the notice by registered mail; or
- (b) the 10th day after the insurer gives the notice, if the insurer gives the notice by personal delivery.

(1.3) A notice of termination mentioned in subcondition (1.2) shall,

- (a) state the amount due under the contract as at the date of the notice; and
- (b) state that the contract will terminate at midnight of the day specified for termination unless the full amount mentioned in clause (a), together with an administration fee not exceeding the amount approved under Part XV of the Act, payable in cash or by money order or certified cheque payable to the order of the insurer or as the notice otherwise directs, is delivered to the address in Ontario that the notice specifies, not later than 12:00 noon on the business day before the day specified for termination.

(1.4) For the purposes of clause (a) of subcondition (1.3), if the insured and the insurer have previously agreed, in accordance with the regulations, that the insured is permitted to pay the premium under the contract in instalments, the amount due under the contract as at the date of the notice shall not exceed the amount of the instalments due but unpaid as at the date of the notice.

(1.5) If the full amount payable under clause (b) of subcondition (1.3) is not paid by the time and in the manner that the notice specifies, the contract shall be deemed to be terminated, without any further action being required on the part of the insurer, as of midnight of the day specified for termination.

- (b) if the termination is for a reason other than non-payment of the whole or any part of the premium due under the contract or of any charge under any agreement ancillary to the contract or if the insurer gives a notice of termination in accordance with subcondition (1.7), the refund shall accompany the notice, unless the premium is subject to adjustment or determination as to the amount, in which case, the refund shall be made as soon as practicable; and
- (c) if the termination is for the reason of non-payment of the whole or any part of the premium due under the contract or of any charge under any agreement ancillary to the contract and if subcondition (1.7) does not apply to the termination, the refund shall be made as soon as practicable after the effective date of the termination.

(3) Subcondition (5) of statutory condition 11 of the Schedule to the Regulation is revoked and the following substituted:

(5) For the purpose of clause (a) of subconditions (1.1) and (1.2), the day on which the insurer gives the notice by registered mail shall be deemed to be the day of mailing.

pris en application de la

LOI SUR LES ASSURANCESpris le 16 février 2005
déposé le 18 février 2005modifiant le Règl. de l'Ont. 777/93
(Conditions légales — Assurance-automobile)

Remarque : Le Règlement de l'Ontario 777/93 a été modifié antérieurement. Ces modifications sont indiquées dans le Sommaire de l'historique législatif des règlements qui se trouve sur le site www.lois-en-ligne.gouv.on.ca.

1. (1) La sous-condition (1) de la condition légale 11 de l'annexe du Règlement de l'Ontario 777/93 est abrogée et remplacée par ce qui suit :

Résiliation

(1) Sous réserve de l'article 12 de la *Loi sur l'assurance-automobile obligatoire* et des articles 237 et 238 de la *Loi sur les assurances*, l'assureur peut, par courrier recommandé ou par remise à personne, aviser l'assuré de la résiliation du contrat.

(1.1) L'avis de résiliation que l'assureur donne en vertu de la sous-condition (1) pour une raison autre que le non-paiement, en totalité ou en partie, de la prime exigible en vertu du contrat ou de frais découlant d'une entente accessoire au contrat ou celui qu'il donne conformément à la sous-condition (1.7) ne peut avoir pour effet de résilier le contrat avant :

- a) le 15^e jour qui suit la remise de l'avis, si l'assureur l'envoie par courrier recommandé;
- b) le cinquième jour qui suit la remise de l'avis, si l'assureur le remet à personne.

(1.2) Sous réserve de la sous-condition (1.7), l'avis de résiliation que l'assureur donne en vertu de la sous-condition (1) pour cause de non-paiement, en totalité ou en partie, de la prime exigible en vertu du contrat ou de frais découlant d'une entente accessoire au contrat est conforme à la sous-condition (1.3) et précise une date de résiliation du contrat qui ne peut être antérieure :

- a) au 30^e jour qui suit la remise de l'avis, si l'assureur l'envoie par courrier recommandé;
- b) au 10^e jour qui suit la remise de l'avis, si l'assureur le remet à personne.

(1.3) L'avis de résiliation mentionné à la sous-condition (1.2) indique ce qui suit :

- a) la somme exigible en vertu du contrat à la date de l'avis;
- b) le fait que le contrat sera résilié à minuit à la date de résiliation précisée, sauf si la somme intégrale qui est mentionnée à l'alinéa a) et des frais d'administration n'excédant pas le montant approuvé dans le cadre de la partie XV de la Loi, payables en espèces ou sous forme de mandat ou de chèque certifié payable à l'ordre de l'assureur ou conformément à l'avis, sont remis à l'adresse en Ontario précisée dans l'avis, au plus tard à midi le jour ouvrable précédant la date de résiliation précisée.

(1.4) Pour l'application de l'alinéa a) de la sous-condition (1.3), la somme exigible en vertu du contrat à la date de l'avis ne doit pas excéder le total des versements échelonnés qui sont exigibles mais non acquittés à cette date si l'assuré et l'assureur ont convenu au préalable, conformément aux règlements, de ce mode de paiement de la prime.

(1.5) Le contrat est réputé, sans autre action de la part de l'assureur, résilié à minuit à la date de résiliation précisée si la somme intégrale qui doit être acquittée aux termes de l'alinéa b) de la sous-condition (1.3) ne l'est pas dans le délai et de la façon qui sont précisés dans l'avis.

(1.6) Le contrat n'est pas résilié à la date de résiliation précisée et l'avis n'a plus aucun effet si la somme intégrale qui doit être acquittée aux termes de l'alinéa b) de la sous-condition (1.3) l'est dans le délai et de la façon qui sont précisés dans l'avis.

(1.7) S'il a déjà donné à deux reprises l'avis de résiliation du contrat mentionné à la sous-condition (1.2), que la somme intégrale qui doit être acquittée aux termes de l'alinéa b) de la sous-condition (1.3) l'a été dans le délai et de la façon précisés dans l'avis et que la totalité ou une partie de la prime exigible en vertu du contrat ou de frais découlant d'une entente accessoire au contrat est de nouveau impayée, l'assureur peut, par courrier recommandé ou par remise à personne, aviser l'assuré de la résiliation du contrat et la sous-condition (1.1), plutôt que la sous-condition (1.2), s'applique à l'avis.

(2) La sous-condition (3) de la condition légale 11 de l'annexe du Règlement est modifiée par substitution de ce qui suit à l'alinéa b) :

- b) si le contrat est résilié pour une raison autre que le non-paiement, en totalité ou en partie, de la prime qui est exigible en vertu du contrat ou de frais découlant d'une entente accessoire au contrat ou que l'assureur donne un avis de résiliation conformément à la sous-condition (1.7), le remboursement accompagne l'avis, sauf si le montant de la prime doit être rajusté ou fixé et, dans ce cas, le remboursement doit se faire le plus tôt possible;
- c) si le contrat est résilié pour cause de non-paiement, en totalité ou en partie, de la prime qui est exigible en vertu du contrat ou de frais découlant d'une entente accessoire au contrat et que la sous-condition (1.7) ne s'applique pas à la résiliation, le remboursement doit se faire le plus tôt possible après la date d'effet de la résiliation.

(3) La sous-condition (5) de la condition légale 11 de l'annexe du Règlement est abrogée et remplacée par ce qui suit :

(5) Pour l'application de l'alinéa a) des sous-conditions (1.1) et (1.2), le jour où l'assureur donne l'avis de résiliation par courrier recommandé est réputé celui de sa mise à la poste.

(4) La condition légale 11 de l'annexe du Règlement est modifiée par adjonction de la sous-condition suivante :

(6) Les heures mentionnées dans la présente condition s'entendent de l'heure locale au lieu de résidence de l'assuré.

2. Le présent règlement entre en vigueur le 1^{er} juin 2005 ou, s'il lui est postérieur, le jour de son dépôt.

Ontario Energy Board**Affiliate Relationships Code for Gas Utilities**

(Originally issued July 31, 1999)

AMENDMENTS**Section 1.1 of the Code is amended as follows:**

The second sentence in section 1.1 is deleted and replaced with the following (amendments italicized):

The principal objectives of the Code *are* to enhance a competitive market while, *at a minimum, keeping* ratepayers *unharméd* by the actions of gas distributors, transmitters and storage companies with respect to dealings with their affiliates.

Section 1.2 is amended as follows:

Section 1.2 is amended by revoking the definition of “Director” and the definition of “fair market value”.

Section 1.2 is further amended by adding the following definitions:

“Affiliate Contract” means any contract between a utility and its affiliate, and includes a Services Agreement

“cost of gas” includes the costs of upstream transportation

“direct costs” means costs that can reasonably be identified with a specific unit of product or service or with a specific operation or cost centre

“fully-allocated cost” means the sum of direct costs plus a proportional share of indirect costs

“indirect costs” means costs that cannot be identified with a specific unit of product or service or with a specific operation or cost centre service, and include but are not limited to overhead costs, administrative and general expenses, and taxes

“market price” means the price reached in an open and unrestricted market between informed and prudent parties, acting at arm’s length and under no compulsion to act

“shared core corporate services” are business functions that provide shared strategic management and policy support to the corporate group of which the utility is a member, relating to legal, finance, tax, treasury, pensions, risk management, audit services, corporate planning, human resources, health and safety, communications, investor relations, trustee, or public affairs

“utility asset” means tangible or intangible property included in the utility’s rate base

Section 1.3 is amended by adding the following sentence at the end of the section:

Nothing in this Code in any way limits the authority of the Board, in a proceeding under section 36 of the Act, to review the prudence of actions taken by a utility and determine what costs should be recovered by a utility through rates.

Section 1.4 is amended by adding the following new section:

Despite section 1.4, section 2.3 of the Code does not apply to a utility that is exempt from the application of section 36 of the Act.

Section 1.5 is amended by adding the following new section:

1.5.2 The amendments to the Code made by the Board on December 9, 2004 come into effect on June 10, 2005. However, for affiliate contracts which were in place on June 3, 2004, the amendments will not apply until after the end of the initial term of any such contract.

Section 2.2.1 is amended by adding the following phrases (italicized):

2.2.1 Where a utility shares services or resources with an affiliate it shall do so in accordance with a Services Agreement, the *length and terms of* which may be reviewed by the Board to ensure compliance with this Code. The Services Agreement shall include *documentation of*:

- (a) the type, quantity and quality of service;
- (b) pricing mechanisms, *which shall be consistent with section 2.2.5 and section 2.3;*
- (c) cost allocation mechanisms, *which shall be consistent with section 2.3.11.3;*
- (d) *information disclosure and confidentiality arrangements, which shall be consistent with section 2.3.1.2; ...*

Section 2.2.5 is amended by adding the following sentence at the end of the section:

The transfer pricing rules set out in section 2.3 do not apply when a utility and an affiliate share services in an emergency situation; a reasonable fully-allocated cost-related price shall be determined afterwards by the parties.

Section 2.3 is revoked and replaced with the following:**2.3 Transfer Pricing and Cost Information Disclosure****Terms of Contracts with Affiliates**

2.3.1 The term of an Affiliate Contract between a utility and an affiliate shall not exceed five years, unless otherwise approved by the Board.

2.3.1.2 A utility shall not enter into or renew an Affiliate Contract with an affiliate unless it contains provisions which require the affiliate to:

- (a) comply promptly with all requests either made or authorized by the Board for information with respect to:

- (i) the services, resources or products provided under the contract; and
 - (ii) the cost to the affiliate of providing any service, resource or product under the contract; and
- (b) include equivalent provisions to those set out in this section in any contracts the affiliate enters into with another of its or the utility's affiliate for the purpose of providing any service, resource or product used in the provision of a service, resource or product to the utility.

Utility's Internal Cost

2.3.2 If a utility intends to enter into an Affiliate Contract for the receipt of a service, product, resource, or use of asset that it currently provides to itself, the utility shall first undertake a business case analysis.

2.3.3 For purposes of section 2.3.2, the business case analysis shall contain (a) description of relevant utility needs on a per-service basis, (b) identification of the options available internally or externally from an affiliate or third party, (c) economic evaluation of all available options including the utility's current fully-allocated cost (which may include a return on the utility's invested capital equal to the approved weighted average cost of capital), (d) explanation of the selection criteria (including any non-price factors to be taken into account), (e) estimate of any benefits to the utility's Ontario ratepayers from outsourcing, and (f) justification of why any separate items were bundled together when considered for outsourcing.

2.3.3.2 If a utility wishes to continue to receive from any affiliate a service, product, resource, or use of asset, the business case analysis described under section 2.3.2 must be repeated at least once every five years.

Where a Market Exists

2.3.4 Where a reasonably competitive market exists for a service, product, resource or use of asset, a utility shall pay no more than the market price when acquiring that service, product, resource or use of asset from an affiliate.

2.3.5 A fair and open competitive bidding process shall be used to establish the market price before a utility enters into or renews a contract with an affiliate.

2.3.6 Despite section 2.3.5, where satisfactory benchmarking or other evidence of market price is available, a competitive tendering or bidding process is not required to establish the market price for contracts with a value of less than \$100,000 or 0.1% of the utility's revenue net of the cost of gas, whichever is greater.

2.3.7 Where the value of a proposed contract exceeds \$300,000 or 0.3% of the utility's revenue net of the cost of gas, whichever is greater, a utility shall not award the contract to an affiliate before an independent evaluator retained by the utility has reported to the utility on how the competing bids meet the criteria established by the utility for the competitive bidding process.

2.3.8 The Board may, for the purposes of sections 2.3.6 and 2.3.7, consider more than one contract to be a single contract where it has been entered into for the purpose of setting the contract values at levels below the threshold level set out in section 2.3.6 or 2.3.7.

2.3.9 Where a reasonably competitive market exists for a service, product, resource or use of asset, a utility shall charge no less than the market price of the service, product, resource or use of asset when selling that service, product, resource or use of asset to an affiliate.

Where No Market Exists

2.3.10 Where it can be established that a reasonably competitive market does not exist for a service, product, resource or use of asset that a utility acquires from an affiliate, the utility shall pay no more than the affiliate's fully-allocated cost to provide that service, product, resource

or use of asset. The fully-allocated cost may include a return on the affiliate's invested capital. The return on invested capital shall be no higher than the utility's approved weighted average cost of capital.

2.3.11 Where a reasonably competitive market does not exist for a service, product, resource or use of asset that a utility sells to an affiliate, the utility shall charge no less than its fully-allocated cost to provide that service, product, resource or use of asset. The fully-allocated cost shall include a return on the utility's invested capital. The return on invested capital shall be no less than the utility's approved weighted average cost of capital.

Shared Core Corporate Services

2.3.11.2 Despite sections 2.3.4 and 2.3.9, for shared core corporate services, fully-allocated cost-based pricing (as defined under sections 2.3.10 and 2.3.11) may be applied between a utility and an affiliate.

2.3.11.3 Reasonable cost allocation shall be applied to all shared corporate services. The methodology for this calculation shall be documented under section 2.2.1(c).

Transfer of Assets

2.3.12 If a utility sells or transfers to an affiliate a utility asset, the price shall be the greater of the market price or the net book value of the asset.

2.3.13 Despite section 2.3.12, the utility may sell or transfer to an affiliate a depreciable utility asset with a net book value of less than \$10,000 at a price equal to that net book value.

2.3.14 Before selling or transferring to an affiliate a utility asset with a net book value that exceeds \$100,000 or 0.1% of the utility's revenue net of the cost of gas, whichever is greater, the utility shall obtain an independent assessment of its market price.

2.3.15 If a utility purchases or obtains the transfer of an asset from an affiliate, the price shall be no more than the market price.

2.3.16 Before a utility purchases or obtains the transfer of an asset from an affiliate with a net book value that exceeds \$100,000 or 0.1% of the utility's revenue net of the cost of gas, whichever is greater, the utility shall obtain an independent assessment of its market price.

Section 2.5.4 is amended as follows:

The word "Director" in clause (c) is deleted and replaced with "Board".

Section 2.8.2 is amended as follows:

The second clause (b) is deleted and replaced with:

- (c) the utility's specific costing and transfer pricing guidelines, bidding procedures and Services Agreement(s).

Amendments approved by Board on December 9, 2004

1.0 INTRODUCTION

1.1 Context

The Golden Horseshoe is one of the fastest growing regions in North America.

The Greenbelt is a cornerstone of Ontario's proposed Greater Golden Horseshoe Growth Plan which is an overarching strategy that will provide clarity and certainty about urban structure, where and how

future growth should be accommodated, and what must be protected for current and future generations.

The Greenbelt Plan identifies where urbanization should not occur in order to provide permanent protection to the agricultural land base and the ecological features and functions occurring on this landscape.

The Greenbelt Plan includes lands within, and builds upon the ecological protections provided by, the Niagara Escarpment Plan (NEP) and the Oak Ridges Moraine Conservation Plan (ORMCP). It also complements and supports other provincial level initiatives such as the Parkway Belt West Plan and the Rouge North Management Plan.

The Protected Countryside lands identified in this Greenbelt Plan are intended to enhance the spatial extent of agriculturally and environmentally protected lands currently covered by the NEP and the ORMCP while at the same time improving linkages between these areas and the surrounding major lake systems and watersheds. Collectively, the lands in these three plans form the Greenbelt. The Protected Countryside (as shown on Schedule 1 of this Greenbelt Plan) is made up of an Agricultural System and a Natural System, together with a series of settlement areas.

The Agricultural System is made up of specialty crop, prime agricultural and rural areas. The Natural System identifies lands that support both natural heritage and hydrologic features and functions. Both systems maintain connections to the broader agricultural and natural systems of southern Ontario.

The settlement areas, identified as Towns/Villages and Hamlets, vary in size, diversity and intensity of uses and are found throughout the Protected Countryside.

While providing permanent agricultural and environmental protection, the Greenbelt also contains important natural resources and supports a wide range of recreational and tourism uses, areas and opportunities together with a vibrant and evolving agricultural and rural economy.

The schedules to this Greenbelt Plan show lands, settlements, roads and natural systems outside of the Greenbelt Area. This Plan does not apply to lands beyond the Greenbelt Area as shown on Schedule 1.

Within the vast majority of south-central Ontario and substantial portions of the Greater Golden Horseshoe beyond the Greenbelt Area, there are extensive agricultural areas, natural and hydrologic features and functions, and other significant resources. The lack of inclusion within the Greenbelt Area does not imply any lesser importance or recognition of the full array of natural environmental and resource attributes found in these areas. Rather, all lands outside of the Greenbelt Area will continue to be governed by current, and potentially future, planning frameworks and regimes which manage land use in Ontario. In addition, no preference for urban structure or the allocation of residential and employment growth beyond the Greenbelt should be inferred from the Greenbelt Plan, as it is intended that these matters be addressed by the planning system and the proposed Growth Plan.

1.2 Vision and Goals

1.2.1 Vision

The Greenbelt is a broad band of permanently protected land which:

- Protects against the loss and fragmentation of the agricultural land base and supports agriculture as the predominant land use;
- Gives permanent protection to the natural heritage and water resource systems that sustain ecological and human health and that form the environmental framework around which major urbanization in south-central Ontario will be organized; and
- Provides for a diverse range of economic and social activities associated with rural communities, agriculture, tourism, recreation and resource uses.

1.2.2 Goals

To enhance our urban and rural areas and overall quality of life by promoting the following matters within the Protected Countryside:

1. Agricultural Protection

- a) Protection of the *specialty crop area* land base while allowing supportive infrastructure and value added uses necessary for sustainable agricultural uses and activities;
- b) Support for the Niagara Peninsula *specialty crop area* as a destination and centre of agriculture focused on the agri-food sector and agri-tourism related to grape and tender fruit production;
- c) Protection of *prime agricultural areas* by preventing further fragmentation and loss of the agricultural land base caused by lot creation and the redesignation of *prime agricultural areas*;
- d) Provision of the appropriate flexibility to allow for *agriculture, agriculture-related* and *secondary uses, normal farm practices* and an evolving agricultural/rural economy; and
- e) Increasing certainty for the agricultural sector to foster long-term investment in, improvement to, and management of the land.

2. Environmental Protection

- a) Protection, maintenance and enhancement of natural heritage, hydrologic and *landform* features and functions, including protection of habitat for flora and fauna and particularly species at risk;
- b) Protection and restoration of natural and open space connections between the Oak Ridges Moraine, the Niagara Escarpment, Lake Ontario, Lake Simcoe and the major river valley lands, while also maintaining connections to the broader natural systems of southern Ontario beyond the Golden Horseshoe such as the Great Lakes Coast, the Carolinian Zone, the Lake Erie Basin, the Kawartha Highlands and the Algonquin to Adirondacks Corridor;
- c) Protection, improvement or restoration of the quality and quantity of ground and surface water and the hydrological integrity of watersheds; and
- d) Provision of long-term guidance for the management of natural heritage and water resources when contemplating such matters as development, infrastructure, open space planning and management, aggregate rehabilitation and private or public stewardship programs.

3. Culture, Recreation and Tourism

- a) Support for the conservation and promotion of cultural heritage resources;
- b) Provision of a wide range of publicly accessible built and natural settings for recreation including facilities, parklands, open space areas, trails and water-based/shoreline uses that support hiking, angling and other recreational activities; and
- c) Enabling continued opportunities for sustainable tourism development.

4. Settlement Areas

- a) Support for a strong rural economy by allowing for the social, economic and service functions through the residential, institutional and commercial/industrial uses

needed by the current and future population within the Greenbelt, particularly within settlements; and

- b) Sustaining the character of the countryside and rural communities.

5. Infrastructure and Natural Resources

- a) Support for infrastructure which achieves the social and economic aims of the Greenbelt and the proposed Growth Plan while seeking to minimize environmental impacts;
- b) Recognition of the benefits of protecting renewable and non-renewable natural resources within the Greenbelt; and
- c) Provision for the availability and sustainable use of those resources critical to the region's social, environmental, economic and growth needs.

1.3 General Authority

This Plan derives its authority from the *Greenbelt Act, 2005*, which authorizes the Lieutenant Governor in Council, by regulation, to designate an area of land as the Greenbelt Area. The *Greenbelt Act, 2005* further authorizes the Lieutenant Governor in Council to establish a Greenbelt Plan for all or part of the Greenbelt Area.

The Greenbelt Plan applies to the lands delineated in Ontario Regulation 59/05, as shown on Schedule 1.

1.4 How to Use this Plan

1.4.1 General

This Greenbelt Plan builds upon the existing policy framework established in the Provincial Policy Statement (PPS), issued under section 3 of the *Planning Act*, and its implementation through municipal official plan policies and maps.

Based on the above, this Greenbelt Plan must be read in conjunction with all other applicable land use planning policy, regulations and/or standards, as amended from time to time. Such documents include but are not limited to: the PPS; Minister's zoning orders under section 47 of the *Planning Act*; the proposed Greater Golden Horseshoe Growth Plan; other provincial land use plans; upper, lower and single-tier municipal official plans; zoning by-laws; regulations including those under the *Conservation Authorities Act*, as well as other pertinent legislation (e.g. the federal *Fisheries Act*) and regulations. Where more specific provincial plans or regulations apply to lands within the Greenbelt, including plans under the *Ontario Planning and Development Act, 1994*, the more specific plan or regulation shall prevail.

1.4.2 Structure of the Plan

The Greenbelt Plan consists of:

Section 1.0 – Introduction: Describes the context for the Greenbelt Plan in southern Ontario and introduces the Plan's Vision and Goals. The legislative authority for the Plan and how it is to be used and applied within the land use planning system are also set out in this section.

Section 2.0 – Greenbelt Plan: Describes the lands governed by the Greenbelt Plan, which include the NEP Area, the Oak Ridges Moraine Area, the Parkway Belt West Plan Area and lands designated Protected Countryside in this Plan. It describes how lands in the three existing provincial plans are affected by this Plan, and that lands designated as Protected Countryside within the Greenbelt Area are subject to the entire Greenbelt Plan.

Section 3.0 – Geographic Specific Policies in the Protected Countryside: Sets out the three key policy areas in the Protected Countryside designation that are spatially based: the Agricultural System, the Natural System and *Settlement Areas*.

The Agricultural System is comprised of *specialty crop areas*, *prime agricultural areas* and *rural areas*. While the Greenbelt Plan identifies the boundaries of the *specialty crop areas*, it relies on municipal official plans to delineate *prime agricultural areas* and *rural areas*.

The Natural System is comprised of the Natural Heritage System, Water Resource System and *key natural heritage features* and *key hydrologic features*. The Natural Heritage System is not a designation in and of itself with a list of permitted uses. Rather, it functions as an overlay on top of the *prime agricultural* and/or *rural area* designations contained in municipal official plans. As such, permitted uses are those set out within the *prime agricultural area* and *rural area* designations of municipal official plans, subject to constraints of the Natural System.

Settlement Areas are comprised of Towns/Villages and Hamlets. Although this Plan shows boundaries for Towns/Villages, Hamlets are only shown as symbols. In both cases, this Plan defers to municipal official plans for the detailed delineation of settlement boundaries. Further, this Plan does not apply to lands within the boundaries of Towns/Villages and Hamlets, as they existed on the day this Plan came into effect. Municipal official plans will continue to govern land use within these settlements. However, where expansions to settlements permitted by this Plan are proposed, the policies of this Plan apply to such expansions.

Lands in the Protected Countryside will be within one of the following policy areas: *Specialty Crop Areas*, *Prime Agricultural Areas*, *Rural Areas*, Towns/Villages, Hamlets or Shoreline Areas. In addition, lands may also be subject to the policies of the Natural Heritage System and *key natural heritage features* and *key hydrologic features*.

Also described in this section are policies regarding parkland, open space and trails in the Greenbelt.

Section 4.0 – General Policies in the Protected Countryside: Describes the general policies that apply across the Protected Countryside. These policies are based on certain uses (non-agricultural uses, recreation and tourism uses, *infrastructure*, natural resource uses, cultural heritage resources and *existing uses*). This section also contains policies on lot creation.

Section 5.0 – Implementation: Provides a description of:

- The status and effect of the Plan;
- How the Plan is to be implemented;
- The relationship of the Plan to the land use planning system;
- How boundaries are to be interpreted;
- The process for reviewing and amending the Plan;
- Monitoring and performance measures; and
- The Greenbelt Council.

1.4.3 How to Read this Plan

The following is a brief description of how this Plan, read in its entirety, affects a specific area, land use or *development/infrastructure/resource* proposal.

1. Refer to Schedule 1 to determine if the lands are located within the NEP Area or the Oak Ridges Moraine Area. If the property is located in either of these areas, the policies of the NEP or the ORMCP continue to apply as set out in section 2.0. If the lands are located in the Protected Countryside designation, then the entirety of the Greenbelt Plan's relevant policies apply. Determine if the lands are located within the Parkway Belt West Plan. If so, the policies of the Parkway Belt West Plan continue to apply as set out in section 2.0.
2. If lands are within the Protected Countryside, determine which of the Geographic Specific Policies apply as described in section 3.0. This is accomplished by a series of steps.

Refer to Schedules 1, 2 and 3 of this Plan to determine if the lands are located within a *specialty crop area* or a

Town/Village or Hamlet. If lands are located in a *specialty crop area*, refer to the policies of this Plan. If lands are located in a Town/Village or Hamlet, refer to municipal official plans (unless it is a proposed expansion of a settlement, in which case refer to the policies of this Plan). Also, refer to the General Policies of this Plan as described below.

If the lands are not in a *specialty crop area* or Town/Village or Hamlet, determine in which municipality the lands are located and refer to the municipal official plans that are in effect to determine if the lands are designated prime agricultural or rural (or a similar designation to rural). Once this determination is made, refer to the Agricultural System policies of this Plan (section 3.1) to determine if there are any additional restrictions or requirements relating to *prime agricultural areas* or *rural areas*.

Refer to Schedule 4 of this Plan to determine if the lands are located within the Natural Heritage System. If so, refer to the Natural System policies of section 3.2, which is an overlay on top of the *prime agricultural* and/or *rural area* designations of municipal official plans.

Refer to municipal official plans, data or information on natural features from provincial, municipal and agency (e.g. conservation authority) sources, and conduct a preliminary assessment of the property to determine if there are any *key natural heritage features* or *key hydrologic features* on the lands. If so, refer to the natural features policies of section 3.2.4 of this Plan.

3. Determine which general policies in section 4.0 may apply to the lands based on the type of use or whether lot creation is proposed.
4. Determine how the policies of the Plan apply to matters that may be subject to transition under the provisions of the *Greenbelt Act, 2005*, in conjunction with the Implementation policies in section 5.0.
5. Determine how the other Implementation policies in section 5.0 may apply to the lands including how this Plan works with other applicable legislation, regulations, policy and planning documents and/or whether there are any boundary interpretation policies to be considered.

2.0 GREENBELT PLAN

The Greenbelt Area, as defined by Ontario Regulation 59/05, is governed by this Greenbelt Plan, which includes lands within the NEP Area, the Oak Ridges Moraine Area, the Parkway Belt West Plan Area, and lands designated as Protected Countryside by this Plan.

2.1 Lands within the Oak Ridges Moraine Area

The requirements of the ORMCP (Ontario Regulation 140/02), made under the *Oak Ridges Moraine Conservation Act, 2001*, continue to apply and the Protected Countryside policies do not apply with the exception of section 3.3.

Where, by the operation of subsection 2(4) of the ORMCP, lands are within the Oak Ridges Moraine Area but are not governed by the policies of the ORMCP, the lands are deemed to be within the Protected Countryside and all of the policies of the Greenbelt Plan apply to the lands.

2.2 Lands within the Niagara Escarpment Plan Area

The requirements of the NEP, established under the *Niagara Escarpment Planning and Development Act*, continue to apply and the Protected Countryside policies do not apply with the exception of section 3.3.

2.3 Lands within the Parkway Belt West Plan Area

The requirements of the Parkway Belt West Plan, deemed to be a development plan under the *Ontario Planning and Development Act, 1994* continue to apply to lands within the Parkway Belt West Plan Area and the Protected Countryside policies do not apply with the exception of sections 3.2 and 3.3.

2.4 Lands within the Protected Countryside Area

Lands within the Protected Countryside, as shown on Schedule 1, are subject to the entirety of this Greenbelt Plan.

3.0 GEOGRAPHIC SPECIFIC POLICIES IN THE PROTECTED COUNTRYSIDE

There are three types of Geographic Specific Policies that apply to specific lands within the Protected Countryside: Agricultural System, Natural System and *Settlement Areas*. In addition there are General Policies, and Parkland, Open Space and Trails policies that apply to the Protected Countryside, however, the Parkland, Open Space and Trails policies apply across the Greenbelt.

3.1 Agricultural System

3.1.1 Description

The Protected Countryside contains an Agricultural System that provides a continuous and permanent land base necessary to support long-term agricultural production and economic activity. Many of the farms within this system also contain important natural heritage and hydrologic features, and the stewardship of these farms has facilitated both environmental and agricultural protection. The Agricultural System is therefore integral to the long-term sustainability of the Natural Heritage System within the Protected Countryside. It is through evolving agricultural and environmental approaches and practices that this relationship can continue and improve.

The Agricultural System is made up of *specialty crop areas*, *prime agricultural areas* and *rural areas*. The Agricultural System includes expansive areas where prime agricultural and specialty crop lands predominate and active agricultural and related activities are ongoing. The delineation of the Agricultural System was guided by a variety of factors including a land evaluation area review (LEAR) which assessed such matters as soils, climate, productivity and land fragmentation; the existing pattern of agriculturally protected lands set out in municipal official plans; and a consideration of projected future growth patterns.

There are two *specialty crop areas*: the Niagara Peninsula Tender Fruit and Grape Area and the Holland Marsh. The delineation of the Niagara Peninsula Tender Fruit and Grape Area (see Schedule 2) is based on provincial soil and climate analysis of current and potential tender fruit and grape production areas. The Holland Marsh boundary is based on provincial muck soil analysis and current agricultural production in both the Region of York and the County of Simcoe (see Schedule 3).

Prime agricultural areas, are those lands designated as such within municipal official plans.

Rural areas are those lands outside of *settlement areas* which are not *prime agricultural areas* and which are generally designated as rural or open space within municipal official plans. *Rural areas* are typically characterized by a mixture of agricultural lands, natural features and recreational and historic rural land uses.

Municipalities may amend their municipal official plan designations for *prime agriculture areas* and *rural areas* when they bring their official plans into conformity with the Greenbelt Plan, subject to the criteria identified in the municipal implementation policies of section 5.2.

3.1.2 Specialty Crop Area Policies

For lands falling within the *specialty crop area* of the Protected Countryside the following policies shall apply:

1. Within *specialty crop areas*, *normal farm practices* and a full range of *agricultural*, *agriculture-related* and *secondary uses* are supported and permitted.
2. Lands within *specialty crop areas* shall not be redesignated in municipal official plans for non-agricultural uses, with the exception of those uses permitted in the general policies of sections 4.2 to 4.6.
3. Towns/Villages and Hamlets are not permitted to expand into *specialty crop areas*.
4. New land uses, including the creation of lots, as permitted by the policies of this Plan, and new or expanding livestock facilities shall comply with the *minimum distance separation formulae*.

3.1.3 Prime Agricultural Area Policies

For lands falling within the *prime agricultural area* of the Protected Countryside the following policies shall apply:

1. Within *prime agricultural areas*, as identified in municipal official plans, *normal farm practices* and a full range of *agricultural*, *agriculture-related* and *secondary uses* are supported and permitted.
2. *Prime agricultural areas* shall not be redesignated in municipal official plans for non-agricultural uses except for:
 - a) Refinements to the prime agricultural and rural area designations, subject to the criteria identified in the municipal implementation policies of section 5.2; or
 - b) *Settlement area* expansions subject to the *settlement area* policies of section 3.4.
3. Other uses may be permitted subject to the general policies of sections 4.2 to 4.6.
4. New land uses and the creation of lots, as permitted by the policies of this Plan, and new or expanding livestock facilities shall comply with the minimum distance separation formulae.

3.1.4 Rural Area Policies

For lands falling within the *rural area* of the Protected Countryside the following policies shall apply:

1. *Rural areas* support, and provide the primary locations for a range of recreational, tourism, institutional and resource-based commercial/ industrial uses. They also contain many historic highway commercial, non-farm residential and other uses which, in more recent times, would be generally directed to *settlement areas* but which are recognized as *existing uses* by this Plan and allowed to continue and expand subject to the *existing use* policies of section 4.5. Notwithstanding this policy or the policies of section 5.3, municipal official plans may be more restrictive than this Plan with respect to the types of uses permitted within *rural areas*.
2. *Rural areas* also contain many existing agricultural operations. *Existing* and new *agricultural uses* are allowed and *normal farm practices* and a full range of *agricultural*, *agriculture-related* and *secondary uses* are supported and permitted.
3. *Settlement area* expansions are permitted into *rural areas*, subject to the *settlement area* policies of section 3.4.
4. Other uses may be permitted subject to the general policies of sections 4.1 to 4.6.

5. *New multiple units or multiple lots for residential dwellings*, (e.g. estate residential subdivisions and adult lifestyle or retirement communities), whether by plan of subdivision, condominium or severance, shall not be permitted in *rural areas*. Notwithstanding this policy, municipal official plans may be more restrictive than this Plan with respect to residential severances and shall provide guidance for the creation of lots within the *rural area* not addressed in this Plan. Regardless, new lots for any use shall not be created if the creation would extend or promote strip development.
6. New land uses, the creation of lots (as permitted by the policies of this Plan), and new and expanding livestock facilities shall comply with the *minimum distance separation formulae*.

3.1.5 External Connections

The Greenbelt Agricultural System is connected both functionally and economically to the prime agricultural resource lands and agri-food sector beyond the boundaries of the Greenbelt.

To support the connections between the Greenbelt's Agricultural System and the prime agricultural resource areas of southern Ontario, municipalities, farming organizations, and other agencies and levels of government are encouraged to consider how activities and changes in land use, both within and abutting the Greenbelt, relate to the broader agricultural system and economy of southern Ontario and they should plan appropriately to ensure both functional and economic connections are maintained and strengthened.

3.2 Natural System

3.2.1 Description

The Protected Countryside contains a Natural System that provides a continuous and permanent land base necessary to support human and ecological health in the Greenbelt and beyond. The Natural System policies protect areas of natural heritage, hydrologic and/or *landform* features, which are often functionally inter-related and which collectively support biodiversity and overall ecological integrity.

The Natural System within the Protected Countryside functions at three scales:

1. The system builds upon and is connected to other Golden Horseshoe scale natural systems as identified within the NEP and the ORMCP (see Appendix 1);
2. The system is connected to and/or supports broader natural systems in southern Ontario such as the Great Lakes Coast, Carolinian Zone and the Kawartha Highlands; and
3. The system is supported by a multitude of natural and hydrologic features and functions found within the Golden Horseshoe but outside of the NEP and the ORMCP. In particular, the numerous watersheds, subwatersheds and groundwater resources, including the network of tributaries that support the major river systems identified in this Plan, are critical to the long-term health and sustainability of water resources and biodiversity and overall ecological integrity. The analysis and management of the Greenbelt's water resources must therefore be integrated with the management of water resources outside the Greenbelt. Municipal official plans and related resource management efforts by conservation authorities and others shall continue to assess and plan for these natural and hydrologic features in a comprehensive and integrated manner, which builds upon and supports the natural systems identified within the Greenbelt.

The Natural System is made up of a Natural Heritage System and a Water Resource System that often coincides given ecological linkages between terrestrial and water based functions.

The **Natural Heritage System** (see Schedule 4) includes areas of the Protected Countryside with the highest concentration of the most sensitive and/or *significant* natural features and functions. These areas need to be managed as a connected and integrated natural heritage system given the functional inter-relationships between them, and the fact this system builds upon the natural systems contained in the NEP and the ORMCP. Together with the landscape surrounding the Greenbelt, these systems currently comprise, and function as, a connected natural heritage system.

The **Water Resource System** is made up of both ground and surface water features and their associated functions, which provide the water resources necessary to sustain healthy aquatic and terrestrial ecosystems and human water consumption. The ORMCP and NEP include very significant elements of, and are fundamental to, the Water Resource System. The areas to which these plans apply contain primary recharge, headwater and discharge areas, together with major drinking water aquifers, within the Greenbelt.

The Protected Countryside includes several areas of hydrologic significance, including:

- The upper reaches of watersheds draining to Lake Ontario to the west of the Niagara Escarpment;
- Lands around the primary discharge zones along the toe of the Escarpment and base of the Oak Ridges Moraine;
- The major river valleys that flow from the Oak Ridges Moraine and the Niagara Escarpment to Lake Ontario;
- The portions of the Lake Simcoe watershed and the former Lake Algonquin Shoreline within York and Durham Regions; and
- The former Lake Iroquois shoreline in Durham and Niagara Regions.

These areas of hydrological significance incorporated into the Greenbelt function together with other hydrological features both within the Greenbelt and within the remainder of watersheds that extend outside of the Greenbelt to form water resource systems.

3.2.2 Natural Heritage System Policies

For lands within the Natural Heritage System of the Protected Countryside the following policies shall apply:

1. The full range of existing and new *agricultural, agricultural-related* and *secondary uses* and *normal farm practices* are permitted subject to the policies of 3.2.2.2 below.
2. New buildings or structures for *agriculture, agricultural-related* and *secondary uses* are not subject to the Natural Heritage System policies below, but are subject to the policies on *key natural heritage features* and *key hydrologic features* as identified in the natural features policies of section 3.2.4.
3. New *development* or *site alteration* in the Natural Heritage System (as permitted by the policies of this Plan) shall demonstrate that:
 - a) There will be no negative effects on *key natural heritage features* or *key hydrologic features* or their functions;
 - b) *Connectivity* between *key natural heritage features* and *key hydrologic features* is maintained, or where possible, enhanced for the movement of native plants and animals across the landscape;
 - c) The removal of other natural features not identified as *key natural heritage features* and *key hydrologic features* should be avoided. Such features should be incorporated into the planning and design of the proposed use wherever possible; and
 - d) The disturbed area of any site does not exceed 25 percent, and the impervious surface does not exceed 10 percent, of the *total developable area*, except for uses described in and governed by sections 4.1.2 and

4.3.2. With respect to golf courses, the disturbed area shall not exceed 40 percent of the site.

adversely affect the quality and quantity of ground and surface waters.

4. Where non-agricultural uses are contemplated within the Natural Heritage System, applicants shall demonstrate that:
 - a) At least 30 percent of the *total developable area* of the site will remain or be returned to *natural self-sustaining vegetation*, recognizing that section 4.3.2 establishes specific standards for the uses described there;
 - b) *Connectivity* along the system and between *key natural heritage features* or *key hydrologic features* located within 240 metres of each other is maintained or enhanced; and
 - c) Buildings or structures do not occupy more than 25 percent of the *total developable area* and are planned to optimize the compatibility of the project with the natural surroundings.
5. The Natural Heritage System, including the natural features policies of section 3.2.4, does not apply within the existing boundaries of *settlement areas*, but does apply when considering expansions to settlements as permitted by the policies of this Plan. Municipalities should consider the Natural Heritage Systems connections within *settlement areas* when implementing municipal policies, plans and strategies.
6. When official plans are brought into conformity with this Plan, the boundaries of the Natural Heritage System may be refined, with greater precision, in a manner that is consistent with this Plan and the system shown on Schedule 4.
7. Where regulations or standards of other agencies or levels of government exceed the standards related to *key natural heritage features* or *key hydrologic features* in this Plan, such as may occur with *hazardous lands* under section 28 of the *Conservation Authorities Act* or with fisheries under the *Federal Fisheries Act*, the most restrictive provision or standard applies.

3.2.3 Water Resource System Policies

The following Water Resource System policies apply throughout the Protected Countryside:

1. All planning authorities shall provide for a comprehensive, integrated and long-term approach for the protection, improvement or restoration of the quality and quantity of water. Such an approach will consider all hydrologic features and functions and include a systems approach to the inter-relationships between and/or among recharge/discharge areas, aquifers, headwaters and surface waters (e.g. *lakes* as well as rivers and streams, including *intermittent streams*).
2. Watersheds are the most meaningful scale for hydrological planning, and municipalities together with conservation authorities should ensure that *watershed plans* are completed and used to guide planning and *development* decisions within the Protected Countryside.
3. Cross-jurisdictional and cross-watershed impacts need to be considered in the development of *watershed plans*. The development of *watershed plans* and watershed management approaches in the Protected Countryside should be integrated with watershed planning and management in the NEP and the ORMCP areas and beyond the Greenbelt.
4. Municipalities shall, in accordance with provincial direction related to the protection of source water, protect *vulnerable* surface and ground water areas, such as wellhead protection areas, from *development* that may

3.2.4 Key Natural Heritage Features and Key Hydrologic Features Policies

Key natural heritage features include:

- *Significant habitat of endangered species, threatened species and special concern species;*
- *Fish habitat;*
- *Wetlands;*
- *Life Science Areas of Natural and Scientific Interest (ANSIs);*
- *Significant valleylands;*
- *Significant woodlands;*
- *Significant wildlife habitat;*
- *Sand barrens, savannahs and tallgrass prairies;* and
- *Alvars*

Key hydrologic features include:

- *Permanent and intermittent streams;*
- *Lakes* (and their littoral zones);
- *Seepage areas and springs;* and
- *Wetlands*

For lands within a *key natural heritage feature* or a *key hydrologic feature* in the Protected Countryside, the following policies shall apply:

1. *Development* or *site alteration* is not permitted in *key hydrologic features* and *key natural heritage features* within the Natural Heritage System, including any associated *vegetation protection zone*, with the exception of:
 - a) Forest, fish and wildlife management;
 - b) Conservation and flood or erosion control projects, but only if they have been demonstrated to be necessary in the public interest and after all alternatives have been considered; or
 - c) *Infrastructure*, aggregate, recreational, shoreline and *existing uses*, as described by and subject to the general policies of section 4 of this Plan.
2. Beyond the Natural Heritage System within the Protected Countryside (as shown on Schedule 4), *key hydrologic features* are defined by and subject to the natural features policies of section 3.2.4.
3. Beyond the Natural Heritage System within the Protected Countryside (as shown on Schedule 4), *key natural heritage features* are not subject to the natural features policies of section 3.2.4 of this Plan, but are to be defined pursuant to, and subject to the policies of, the PPS.
4. In the case of *wetlands*, *seepage areas and springs*, *fish habitat*, *permanent and intermittent streams*, *lakes*, and *significant woodlands*, the minimum *vegetation protection zone* shall be a minimum of 30 metres wide measured from the outside boundary of the *key natural heritage feature* or *key hydrologic feature*.
5. A proposal for new *development* or *site alteration* within 120 metres of a *key natural heritage feature* within the Natural Heritage System or a *key hydrologic feature* anywhere within the Protected Countryside requires a natural heritage evaluation and hydrological evaluation, which identify a *vegetation protection zone* which:
 - a) Is of sufficient width to protect the *key natural heritage feature* or *key hydrologic feature* and its functions from the impacts of the proposed change and associated activities that may occur before, during, and after, construction, and where possible, restore or enhance the feature and/or its function; and
 - b) Is established to achieve, and be maintained as *natural self-sustaining vegetation*.
6. Expansions to existing agricultural buildings and structures and farm and non-farm dwellings, together with accessory

uses, are permitted in *key natural heritage features*, subject to the *existing use* policies of section 4.5 of this Plan.

7. Notwithstanding the natural features policies of section 3.2.4 of this Plan, new buildings and structures for agricultural uses will be required to provide a 30 metre *vegetation protection zone* from a *key natural heritage feature* or *key hydrologic feature*, but may be exempted from the requirement of establishing a condition of *natural self-sustaining vegetation* if the land is, and will continue to be, used for agricultural purposes. Despite this exemption, agricultural uses should pursue best management practices to protect and/or restore *key hydrologic features* and functions.

3.2.5 External Connections

The Natural Heritage System is connected to local, regional and provincial scale natural heritage, water resource and agricultural systems beyond the boundaries of the Greenbelt.

To support the connections between the Greenbelt's Natural System and the local, regional and broader scale natural heritage systems of southern Ontario, such as the Lake Ontario shoreline, including its remaining coastal *wetlands*, the Great Lakes Coast, Lake Simcoe, the Kewartha Highlands, the Carolinian Zone and the Algonquin to Adirondack Corridor, the federal government, municipalities, conservation authorities, other agencies and stakeholders should:

1. Consider how activities and land use change both within and abutting the Greenbelt relate to the areas of external connections identified in this Plan;
2. Promote and undertake appropriate planning and design to ensure that external connections are maintained and/or enhanced; and
3. Undertake watershed based planning, which integrates supporting ecological systems with those systems contained in this Plan.

The river valleys that run through existing or approved urban areas and connect the Greenbelt to inland *lakes* and the Great Lakes are a key component of the long-term health of the Natural System. In recognition of the function of the urban river valleys, municipalities and conservation authorities should:

1. Continue with stewardship, remediation and appropriate park and trail initiatives which maintain and, to the extent possible, enhance the ecological features and functions found within these valley systems;
2. In considering land conversions or redevelopments in or abutting an urban river valley, strive for planning approaches that:
 - a) Establish or increase the extent or width of *vegetation protection zones* in *natural self-sustaining vegetation*, especially in the most ecologically sensitive areas (i.e. near the stream and below the *stable top of bank*);
 - b) Increase or improve *fish habitat* in streams and in the adjacent riparian lands;
 - c) Include landscaping and habitat restoration that increase the ability of native plants and animals to use valley systems as both *wildlife habitat* and movement corridors; and
 - d) Seek to avoid, minimize and/or mitigate impacts associated with the quality and quantity of urban run-off into the valley systems; and
3. Integrate watershed planning and management approaches for lands both within and beyond the Greenbelt.

In addition to the urban river valleys, portions of the former Lake Iroquois shoreline, particularly within Durham Region, traverse existing or approved urban areas. Municipalities should consider planning,

design and construction practices that maintain or where possible enhance the size, diversity and *connectivity* of *key natural heritage features* and *key hydrologic features* and functions of those portions of the Lake Iroquois shoreline within their approved urban boundaries.

These external connections are generally depicted by a dotted green line on Schedule 1 and 4, but are not within the regulated boundary of the Greenbelt Plan.

3.2.6 The Rouge River Watershed and Park

The Rouge River Watershed is of particular significance within the Protected Countryside because of the extensive public investment in establishing the Rouge Park and the efforts of all levels of government in preparing the Rouge North Management Plan. The Rouge Watershed and the Little Rouge River serve as a vital ecological corridor linking the environmental systems of Lake Ontario to the Oak Ridges Moraine in this area of the Greater Toronto Area.

This plan identifies a 600 m wide corridor for the Little Rouge River as the main ecological corridor, between Lake Ontario and the southerly boundary of Oak Ridges Moraine Area, as well as several other Rouge River tributaries, in recognition of the longstanding commitment to establishing the Rouge Park.

Land use planning and resource management within those portions of the Rouge River watershed within the Protected Countryside shall comply with the provisions of both this Plan and the Rouge North Management Plan. In the case of a conflict between this Plan and the Rouge North Management Plan, the more restrictive policies apply. For those lands within the watershed north of Steeles Avenue, outside of the Protected Countryside, the Rouge North Management Plan and the Rouge North Implementation Manual, together with any municipal or conservation authority plans or initiatives which build on and/or support the Rouge North Management Plan, should be considered as the guiding land planning and resource management documents. For those lands within the Rouge Park south of Steeles Avenue, outside of the Protected Countryside, the Rouge Park Plan together with any municipal or conservation authority plans or initiatives which build on and/or support the Rouge Park Plan should be considered as the guiding land use planning and resource management documents.

3.3 Parkland, Open Space and Trails

3.3.1 Description

A system of parklands, open spaces, water bodies, and trails across the Greenbelt is necessary to provide opportunities for recreation, tourism and cultural/natural heritage appreciation, as well as to support environmental protection. This system currently supports a variety of passive and active uses, as well as health, economic and other quality of life benefits within the Greenbelt.

It should be recognized that parkland, open space and trails exist within surroundings of predominantly privately held lands. While private land owners may, and do, adopt a collaborative approach with groups such as hiking and snowmobile associations to allow public access across portions of their property, this is only with the consent of the landowner.

Maintaining and expanding the supply of publicly accessible parkland, open space and trails is encouraged through strategic planning activities that identify, plan for and protect these resources for current and future generations. The planning and activity associated with parkland, open space and trail uses should maximize the opportunity to cooperate with all landowners.

Throughout the Greenbelt, there is existing public parkland and open space, as well as existing major trails such as the Bruce Trail, the Trans Canada Trail, the Niagara Greenway and the Lake Ontario Waterfront Trail. This system of parks and trails provides significant economic benefits and opportunities for a multitude of uses and activities compatible with the Greenbelt's vision and goals. This system should serve as a base for future decisions on parkland and open space use and trail development.

3.3.2 Parkland, Open Space and Trail Policies

The Province should, in partnership with municipalities, conservation authorities, non-government organizations, and other interested parties:

1. Encourage the development of a system of publicly accessible parkland, open space and trails where people can pursue the types of recreational activities envisaged by this Plan, and to support the *connectivity* of the Natural Heritage System;
2. Encourage the development of a trail plan and a coordinated approach to trail planning and development in the Greenbelt to enhance key existing trail networks and to strategically direct more intensive activities away from sensitive landscapes; and
3. Promote good stewardship practices for public and private lands within the Greenbelt, including clear demarcation of where public access is permitted.

3.3.3 Municipal Parkland, Open Space and Trail Strategies

For all lands falling within the Protected Countryside, municipalities should:

1. Provide for a full range of publicly accessible, built and natural settings for recreation including facilities, parklands, open space areas, trails and water-based activities;
2. Develop and incorporate strategies (such as community-specific levels of provision) into official plans to guide the adequate provision of municipal recreation facilities, parklands, open space areas and trails;
3. Include the following considerations in municipal parkland and open space strategies:
 - a) Providing for open space areas for current and future populations and promoting stewardship of open space areas;
 - b) Providing facilities, parklands, open space areas and trails that particularly support an active, healthy community lifestyle;
 - c) Identifying key areas or sites for the future development of major facilities that avoid sensitive landscapes;
 - d) Identifying and targeting under-served areas for improved levels of protection; and
 - e) Protecting the recreation and tourism values of waterfront areas as a high priority; and
4. Include the following considerations in municipal trail strategies:
 - a) Preserving the continuous integrity of corridors (e.g. abandoned railway rights-of-way and utility corridors);
 - b) Planning trails on a cross-boundary basis to enhance interconnectivity where practical;
 - c) Incorporating the existing system of parklands and trails where practical;
 - d) Restricting trail uses that are inappropriate to the reasonable capacity of the site (notwithstanding the ability to continue existing trails/uses);
 - e) Providing for multi-use trail systems which establish a safe system for both motorized and non-motorized uses;
 - f) Supporting and ensuring compatibility with agriculture; and
 - g) Ensuring the protection of the sensitive *key natural heritage features* and *key hydrologic features* and functions of the landscape.

Provincial parks and conservation authority lands are also important components in the development of parkland, open space and trail

strategies. Ongoing management of these lands for publicly accessible recreation, in keeping with environmental management plans and strategies for such areas and the policies of this Plan, is important in providing access to this system. Where geographic-specific park or public land management plans exist, municipalities, agencies and other levels of government must consider such plans when making decisions on land use or *infrastructure* proposals.

3.4 Settlement Areas

3.4.1 Description

Settlement areas within the Greenbelt support and provide significant economic, social and commercial functions to *prime agricultural areas* and *rural areas*. They are an integral part of the long-term economic and social sustainability of the Greenbelt and this Plan envisions that they continue to evolve and grow in keeping with their rural and/or existing character.

The *Settlement areas* have been placed into two categories: Towns/Villages, and Hamlets. These settlements vary significantly in both spatial and population size, diversity/intensity of uses, the type(s) of water and sewage services and the role they play within their municipalities. Settlements of all types are found throughout the Protected Countryside. Towns/Villages and Hamlets are identified on Schedule 1. To determine the exact designated boundaries, reference should be made to municipal official plans.

Towns/Villages have the largest concentrations of population, employment and *development* within the Protected Countryside and tend to be the central *settlement area(s)* for their respective municipality. Although most have full municipal water and sewer services, some only have a *municipal water service* and/or a combination of private and *municipal water services*. Towns/Villages are the focus of development and related economic and social activity.

Hamlets are substantially smaller than Towns/Villages and play a lesser role in accommodating concentrations of residential, commercial, industrial and institutional development. Further, they are typically serviced with individual on-site sewage and water services and thus are not locations to which growth should be directed.

3.4.2 Town/Village Policies

For lands within Town/Villages in the Protected Countryside, the following policies shall apply:

1. Towns/Villages, as identified in municipal official plans and within their approved boundaries as they existed on the date this Plan came into effect, continue to be governed by municipal official plans and related programs or initiatives and are not subject to the policies of this Plan, save for the external connections policies of section 3.2.5.
2. Municipalities are encouraged to continue their efforts to support the long-term vitality of these settlements through appropriate planning and economic development approaches which seek to maintain, intensify and/or revitalize these communities. This includes modest growth that is compatible with the long-term role of these settlements as part of the Protected Countryside and the capacity to provide locally based sewage and water services.
3. *Settlement areas* outside the Greenbelt are not permitted to expand into the Greenbelt.
4. Extensions or expansions of services to *settlement areas* within the Protected Countryside shall be subject to the *infrastructure* policies of section 4.2 of this Plan, including the requirements regarding environmental assessments.
5. At the 10-year Greenbelt Plan review period, modest *settlement area* expansions may be possible for Towns/Villages, provided the proposed growth:

- a) Is on *municipal sewage and water services*;
- b) Would not exceed the assimilative and water production capacities of the local environment as determined on a watershed or subwatershed basis;
- c) Complies with any applicable *watershed plan*;
- d) Does not extend into the Natural Heritage System;
- e) Does not extend into *specialty crop areas*; and
- f) Appropriately implements the requirements of any other provincial and municipal policies, plans, strategies or regulations, including requirements for assessment of need, locational and similar considerations.

3.4.3 Hamlet Policies

For lands within Hamlets in the Protected Countryside, the following policies shall apply:

1. Hamlets, as identified in municipal official plans and within their approved boundaries as they existed on the date this Plan came into effect, continue to be governed by municipal official plans and related programs or initiatives and are not subject to the policies of this Plan, save for the external connections policies of section 3.2.5. This Plan permits infill and *intensification* of Hamlets subject to appropriate water and sewage services.
2. Outside of *specialty crop areas*, minor rounding out of Hamlet boundaries at the time of municipal conformity is also permitted in keeping with the character of the Hamlet. This rounding out is only permitted subject to the *infrastructure* policies contained in section 4.2 of this Plan and municipal official plans.

3.4.4 Additional Policies for Settlement Area Expansion

For *settlement areas* within the Protected Countryside, notwithstanding the policies of section 4.2.1, the following additional policies apply to municipally initiated *settlement area* expansion proposals:

1. Where a municipality had initiated the consideration of a settlement expansion prior to the date this Plan came into effect, such an expansion may be considered through the municipality's exercise to bring its official plan into conformity with this Plan as described in the municipal implementation policies of section 5.2. The proposed expansion shall:
 - a) Prior to December 16, 2003, be supported by:
 - i. A council resolution authorizing the consideration of such an expansion; and
 - ii. The substantial completion of background studies or reports by municipal staff or planning consultants, or the expenditure of municipal funds on the consideration of such expansion.
 - b) Not extend into the Natural Heritage System;
 - c) Not extend into *specialty crop areas*; and
 - d) Maintain the rural and/or existing character of the *settlement area*.
2. Clause 3.4.4.1 does not apply to:
 - a) Those lands within the City of Pickering, in the Regional Municipality of Durham, bounded by the CPR Belleville Line in the south; the York-Durham Townline to the west; and West Duffins Creek to the east; and
 - b) Those lands within the Town of Markham, in the Regional Municipality of York, bounded by the York-Durham Townline to the east; Steeles Avenue to the south; the Little Rouge River to the west; and, 16th Avenue to the north.

4.0 GENERAL POLICIES FOR THE PROTECTED COUNTRYSIDE

4.1 Non-Agricultural Uses

The *rural areas* of the Protected Countryside are intended to continue to accommodate a range of commercial, industrial and institutional uses serving the rural resource and agricultural sectors. They are also intended to support a range of recreation and tourism uses such as trails, parks, golf courses, bed and breakfasts and other tourism based accommodation, serviced playing fields and campgrounds, ski hills and resorts.

4.1.1 General Non-Agricultural Use Policies

For non-agricultural uses, the following policies apply:

1. With the exception of those uses permitted under the general policies of section 4.0 of this Plan and subject to the Natural System policies in section 3.2, non-agricultural uses are not permitted in the *specialty crop area* as shown on Schedule 2 of this Plan or within *prime agricultural areas* in the Protected Countryside as designated in municipal official plans.
2. Proposals for non-agricultural uses must demonstrate that:
 - a) The use is appropriate for location in a *rural area*;
 - b) The type of water and sewer servicing proposed is appropriate for the type of use;
 - c) There are no *negative impacts on key natural heritage features and/or key hydrologic features* or their functions; and
 - d) There are no *negative impacts on the biodiversity or connectivity* of the Natural Heritage System.

4.1.2 Recreational Use Policies

In addition to the non-agricultural use policies of section 4.1.1, recreational uses are also subject to the following policies:

1. Residential dwelling units, other than for an employee, shall not be permitted in association with recreational uses.
2. An application to establish or expand a *major recreational use* in the Natural Heritage System will be accompanied by a vegetation enhancement plan that incorporates planning, design, landscaping, and construction measures that:
 - a) Maintain or, where possible, enhance the amount of *natural self-sustaining vegetation* on the site and the *connectivity* between adjacent *key natural heritage features* or *key hydrologic features*;
 - b) Wherever possible, keep intermittent stream channels and drainage swales in a free-to-grow, low-maintenance condition;
 - c) Minimize the application and use of pesticides and fertilizers; and
 - d) Locate new *natural self-sustaining vegetation* in areas that maximize the *ecological value* of the area.
3. An application to expand or establish a *major recreational use* shall be accompanied by a conservation plan demonstrating how water use and nutrient and biocide will be kept to a minimum, including the establishment and monitoring of targets.
4. Small-scale structures for recreational uses (such as boardwalks, footbridges, fences, docks and picnic facilities) are permitted within *key natural heritage features* and *key hydrologic features*; however, the *negative impacts* on these features should be minimized.

4.1.3 Shoreline Area Policies

The shorelines of Lake Ontario, Lake Simcoe, and Lake Scugog and other inland *lakes* contain substantial amounts of both seasonal and

permanent residential *development*. The shoreline areas of lakes (including the littoral zones) are particularly important and sensitive given the *key natural heritage features* and functions and because of the *connectivity* that shorelines provide for flora and fauna. In addition, the shorelines support a wide range of recreational venues and opportunities, including trail systems such as the Lake Ontario Waterfront Trail.

For shoreline areas falling within the Protected Countryside, the following policies shall apply:

1. For the purposes of this Plan, shoreline areas are those areas where concentrations of existing or approved shoreline *development* are currently zoned and/or designated in municipal official plans, as of the date this Plan came into effect.
2. Subject to any municipal and agency planning requirements, minor rounding out, infill *development*, redevelopment and resort *development* is permitted in shoreline areas along Lake Ontario, Lake Simcoe, Lake Scugog and other inland lakes, subject to the following criteria:
 - a) Municipalities and conservation authorities shall ensure that the *development* is integrated with existing or proposed parks and trails and/or does not constrain ongoing or planned stewardship and remediation efforts;
 - b) The Natural System policies of section 3.2 of this Plan are applied;
 - c) To the extent possible, such *development* enhances the ecological features and functions in shoreline areas;
 - d) Proposals for land use conversions, redevelopments and/or resort *development* shall:
 - i. Establish or increase the extent and width of a *vegetation protection zone* along a shoreline to a minimum of 30 metres;
 - ii. Increase or expand the extent of *fish habitat* in the littoral zone;
 - iii. Minimize erosion, sedimentation and the introduction of nutrient or other pollutants and promote planning, design and construction practices that maintain or improve water quality;
 - iv. Improve the efficiency of sewage disposal facilities in order to reduce nutrient inputs to groundwater and the lake; and
 - v. Integrate landscaping and habitat restoration into the design of the proposal to enhance the ability of native plants and animals to use the shoreline as both *wildlife habitat* and a movement corridor; and
 - e) The capacity of the receiving water body shall be determined considering inputs from both existing and approved development and available capacity shall be demonstrated. Such proposals shall comply with any relevant watershed or subwatershed study and in the case of Lake Simcoe, any such analysis must be considered in the context of the Lake Simcoe Environmental Management Strategy.
3. Notwithstanding the policies of section 4.1.3.2 (d), structures may be permitted in the vegetation protection zone and littoral zone subject to any municipal, agency or other requirements or restrictions, and provided the area occupied by such structures is minimized.

4.2 Infrastructure

Infrastructure is important to economic well-being, human health and quality of life in southern Ontario and the Greenbelt.

There is already extensive local and regional *infrastructure* within the Greenbelt to serve its settlements, agricultural and resource sectors and the rural economy. Existing *infrastructure* must be maintained and new

infrastructure will be needed to continue serving existing and permitted land uses within the Greenbelt.

In addition, major *infrastructure* serving national, provincial and inter-regional needs traverses the Greenbelt. It is also anticipated that new and/or expanded facilities will be needed in the future to serve the substantial growth projected for southern Ontario.

4.2.1 General Infrastructure Policies

For lands falling within the Protected Countryside, the following policies shall apply:

1. All existing, expanded or new *infrastructure* subject to and approved under the *Canadian Environmental Assessment Act*, the *Environmental Assessment Act*, the *Planning Act*, the *Aggregate Resources Act*, the *Telecommunications Act* or by the National or Ontario Energy Boards, or which receives a similar environmental approval, is permitted within the Protected Countryside, subject to the policies of this section and provided it meets one of the following two objectives:
 - a) It supports agriculture, recreation and tourism, rural settlement areas, resource use or the rural economic activity that exists and is permitted within the Greenbelt; or
 - b) It serves the significant growth and economic development expected in southern Ontario beyond the Greenbelt by providing for the appropriate *infrastructure* connections among urban growth centres and between these centres and Ontario's borders.
2. The location and construction of *infrastructure* and expansions, extensions, operations and maintenance of *infrastructure* in the Protected Countryside, are subject to the following:
 - a) Planning, design and construction practices shall minimize, wherever possible, the amount of the Greenbelt, and particularly the Natural Heritage System, traversed and/or occupied by such *infrastructure*;
 - b) Planning, design and construction practices shall minimize, wherever possible, the *negative impacts* and disturbance of the existing landscape, including, but not limited to, impacts caused by light intrusion, noise and road salt;
 - c) Where practicable, existing capacity and coordination with different *infrastructure* services is optimized so that the rural and existing character of the Protected Countryside and the overall urban structure for southern Ontario established by Greenbelt and any provincial growth management initiatives are supported and reinforced;
 - d) New or expanding *infrastructure* shall avoid *key natural heritage features* or *key hydrologic features* unless need has been demonstrated and it has been established that there is no reasonable alternative; and
 - e) Where *infrastructure* does cross the Natural Heritage System or intrude into or result in the loss of a *key natural heritage feature* or *key hydrologic feature*, including related *landform features*, planning, design and construction practices shall minimize *negative impacts* and disturbance on the features or their related functions, and where reasonable, maintain or improve *connectivity*.
3. *Infrastructure* serving the agricultural sector, such as agricultural irrigation systems, may need certain elements to be located within the *vegetation protection zone* of a *key natural heritage feature* or *key hydrologic feature*. In such instances, these elements of the *infrastructure* may be established within the feature itself or its associated *vegetation protection zone* but all reasonable efforts shall be made to keep such *infrastructure* out of *key natural*

heritage features or key hydrologic features or the vegetation protection zones.

4.2.2 Sewage and Water Infrastructure Policies

In addition to the above general infrastructure policies and the *settlement area* policies of section 3.4, the following policies apply to sewer and water *infrastructure* proposals:

1. Proposals for *infrastructure* within or crossing the Protected Countryside shall demonstrate that:
 - a) Sewage and water servicing can be provided in a manner that does not negatively impact ecological features and functions, quality and quantity of ground and surface water, including stream baseflow, and is sufficient to accommodate the proposed use(s);
 - b) Applicable recommendations, standards or targets within *watershed plans* and water budgets are reflected; and
 - c) Any sewage and water servicing installation is planned, designed and constructed to minimize surface and groundwater disruption.
2. Where settlements do not currently have Great Lake or Lake Simcoe based water and sewage services, extensions to or expansions of existing Great Lake or Lake Simcoe based services to such settlements is not permitted, unless such servicing is required to address failed individual on-site sewage or water services or to ensure the protection of public health where it has been determined by a medical officer of health (or health authority) that there is a public health concern associated with existing services within the settlement. The capacity of the services provided in the these circumstances will be restricted to that required to service the affected existing settlement plus the capacity for potential *development* within the approved settlement boundary as it existed on the date this Plan came into effect.
3. Where settlements currently have, or have approvals for, Great Lake based water and/or sewer services as of the date this Plan came into effect, such services may be extended and expanded to service growth within an approved settlement boundary as it existed on the date this Plan came into effect. Where only Great Lake water exists or has been approved, corresponding *municipal sewage service* shall be required in order for any expansion of the current settlement boundary where such expansion would be permitted by this Plan.
4. Where settlement area expansions are contemplated by a municipality, the environmental assessment in support of expanded sewage and water services must be completed or approved prior to amending the boundaries of the settlement within the municipal official plan. The expansion must not extend into the Natural Heritage System or the *specialty crop area*.
5. The extension of *municipal or private communal sewage or water services* outside of a settlement boundary shall only be permitted in the case of health issues or to service *existing uses* and the expansion thereof adjacent to the settlement. Notwithstanding the above, where *municipal water services* exist outside of *settlements areas*, *existing uses* within the service area boundary as defined by the environmental assessment may be connected to such a service.
6. New or expanded partial servicing, where site conditions are suitable for the long-term provision of such services, is only permitted in the following circumstances:
 - a) Where such servicing is necessary to address failed individual on-site sewage or water services serving existing development; or

- b) To allow for infilling and *intensification* within *settlement areas* served by partial services as of the date this Plan came into effect.

7. In the siting of new municipal and other wells, consideration shall be given to the location of *vulnerable* areas.

4.2.3 Stormwater Management Infrastructure Policies

In addition to the above general infrastructure policies and the *settlement area* policies of section 3.4, the following policies apply to stormwater management *infrastructure* proposals:

1. Storm water management ponds are prohibited in *key natural heritage features or key hydrologic features* or their vegetation protected zones, except for those portions of the Protected Countryside that define the major river valleys that connect the Niagara Escarpment and Oak Ridges Moraine to Lake Ontario. In these areas, naturalized stormwater management ponds are permitted provided they are located a minimum of 30 metres away from the edge of the river/stream and in the *vegetation protection zones* of any abutting *key natural heritage features or key hydrologic features*.
2. Applications for *development* and *site alteration* in the Protected Countryside shall be accompanied by a storm water management plan which demonstrates that:
 - a) Planning, design and construction practices will minimize vegetation removal, grading and soil compaction, sediment erosion and impervious surfaces;
 - b) Where appropriate, an integrated treatment approach shall be used to minimize stormwater management flows and structures through such measures as lot level controls and conveyance techniques such as grass swales; and
 - c) Applicable recommendations, standards or targets within *watershed plans* and water budgets are complied with.
3. The objectives of a stormwater management plan are to avoid, minimize and/or mitigate stormwater volume, contaminant loads and impacts to receiving water courses in order to:
 - a) Maintain groundwater quality and flow and stream baseflow;
 - b) Protect water quality;
 - c) Minimize the disruption of pre-existing (natural) drainage patterns wherever possible;
 - d) Prevent increases in stream channel erosion;
 - e) Prevent any increase in flood risk; and
 - f) Protect aquatic species and their habitat.

4.3 Natural Resources

4.3.1 Renewable Resource Policies

For lands falling within the Protected Countryside, the following policies shall apply:

1. Renewable resources are those non-agriculture-based natural resources that support uses and activities such as forestry, water taking, fisheries, conservation, and wildlife management.
2. Activities related to the use of renewable resources are permitted in the Protected Countryside, subject to the policies of this Plan and all other applicable legislation, regulations and municipal planning documents, including the PPS. All such uses shall be undertaken in accordance with the applicable recommendations, standards or targets of any relevant *watershed plan* or water budget.

3. Within a *key natural heritage feature* or *key hydrologic feature*, renewable natural resource activities should be carried out in a manner that maintains or, where possible, improves these features and their functions.

4.3.2 Non-Renewable Resource Policies

For lands within the Protected Countryside, the following policies shall apply:

1. Activities related to the use of non-renewable resources are permitted in the Protected Countryside, subject to all other applicable legislation, regulations and municipal official plan policies and by-laws. The availability of mineral aggregate resources for long-term use will be determined in accordance with the PPS, except as provided below.
2. Non-renewable resources are those non-agriculture based natural resources that have a finite supply, including mineral aggregate resources. Aggregates, in particular, provide significant building materials for our communities and *infrastructure*, and the availability of aggregates close to market is important both for economic and environmental reasons.
3. Notwithstanding the Natural System policies of section 3.2 of this Plan, within the Natural Heritage System, *mineral aggregate operations* and wayside pits and quarries are subject to the following:
 - a) No new *mineral aggregate operation* and no wayside pits and quarries, or any ancillary or accessory use thereto will be permitted in the following *key natural heritage features* and *key hydrologic features*:
 - i. *Significant wetlands*;
 - ii. *Significant habitat of endangered species and threatened species*; and
 - iii. *Significant woodlands* unless the woodland is occupied by young plantation or early successional habitat (as defined by the Ministry of Natural Resources). In this case, the application must demonstrate that the specific provisions of policy 4.3.2.5 (c), (d) and 4.3.2.6 (c) have been addressed, and that they will be met by the operation;
 - b) An application for a new *mineral aggregate operation* or new wayside pits and quarries may only be permitted in other *key natural heritage features* and *key hydrologic features* not identified in 4.3.2.3 (a) and any *vegetation protection zone* associated with such other feature where the application demonstrates:
 - i. How the Water Resource System will be protected or enhanced; and
 - ii. That the specific provisions in 4.3.2.5 (c), (d) and 4.3.2.6 (c) have been addressed, and that they will be met by the operation; and
 - c) Any application for a new *mineral aggregate operation*, or the expansion of an existing *mineral aggregate operation* shall be required to demonstrate:
 - i. How the *connectivity* between *key natural heritage features* and *key hydrologic features* will be maintained before, during and after the extraction of mineral aggregates;
 - ii. How the operator could immediately replace any habitat that would be lost from the site with equivalent habitat on another part of the site or on adjacent lands; and
 - iii. How the Water Resource System will be protected or enhanced; and
 - d) An application for the expansion of an existing *mineral aggregate operation* may be permitted in the Natural Heritage System, including *key natural heritage features* and *key hydrologic features*, and in any associated *vegetation protection zone* only if the related decision is consistent with the PPS.
4. The Ministry of Natural Resources will pursue the following under the *Aggregate Resources Act*, for all *mineral aggregate operations*, including wayside pits and quarries, within the Protected Countryside:
 - a) Rehabilitated area will be maximized and disturbed area minimized on an ongoing basis during the life-cycle of an operation;
 - b) Progressive and final rehabilitation efforts will contribute to the goals of the Greenbelt Plan;
 - c) The Ministry of Natural Resources will determine the maximum allowable disturbed area of each *mineral aggregate operation*. Any excess disturbed area above the maximum will be required to be rehabilitated. For existing operations this shall be completed within 10 years of the date of approval of the Greenbelt Plan, and 50% completed within six years. For new operations, including expansions, the total disturbed area shall not exceed an established maximum allowable disturbed area; and
 - d) An application for a *mineral aggregate operation* or wayside pits and quarries may be permitted only where the applicant demonstrates that the quantity and quality of groundwater and surface water will be maintained as per Provincial Standards under the *Aggregate Resources Act*.
5. When operators are undertaking rehabilitation of *mineral aggregate operation* sites in the Protected Countryside, the following provisions apply:
 - a) The aggregate industry will work with the Ministry of Natural Resources to consider the development and implementation of comprehensive rehabilitation plans in areas of high concentration of *mineral aggregate operations*;
 - b) The disturbed area of a site will be rehabilitated to a state of equal or greater *ecological value*, and for the entire site, long-term ecological integrity will be maintained or restored, and to the extent possible, improved;
 - c) If there are *key natural heritage features* or *key hydrologic features* on the site, or if such features existed on the site at the time of application:
 - i. The health, diversity and size of these *key natural heritage features* and *key hydrologic features* will be maintained or restored and, to the extent possible, improved to promote a net gain of ecological health; and
 - ii. Any permitted extraction of mineral aggregates that occurs in a feature will be completed, and the area will be rehabilitated, as early as possible in the life of the operation.
 - d) Aquatic areas remaining after extraction are to be rehabilitated to aquatic enhancement, which shall be representative of the natural ecosystem in that particular setting or ecodistrict, and the combined terrestrial and aquatic rehabilitation shall meet the intent of 4.3.2.5 (c).
 - e) Outside the Natural Heritage System, and except as provided in 4.3.2.5 (b), (c) and (d), final rehabilitation will appropriately reflect the long-term land use of the general area, taking into account applicable policies of this Plan and, to the extent permitted under this Plan, existing municipal and provincial policies.
6. Final rehabilitation in the Natural Heritage System will meet these additional provisions:
 - a) Where there is no underwater extraction, an amount of land equal to that under natural vegetated cover prior to extraction, and no less than 35% of each license, is to be rehabilitated to forest cover, which shall be representative of the natural ecosystem in that particular setting or ecodistrict;
 - b) Where there is underwater extraction, no less than 35% of the non-aquatic lands of each license is to be rehabilitated to forest cover, which shall be

representative of the natural ecosystem in that particular setting or ecodistrict; and

- c) Rehabilitation will be implemented so that the connectivity of the *key natural heritage features* and the *key hydrologic features* on the site and on adjacent lands will be maintained or restored, and to the extent possible, improved.

7 Operators are encouraged to consider and provide for public access to former aggregate sites upon final rehabilitation.

8. Notwithstanding any provision of this section to the contrary, within the *specialty crop areas* identified on Schedule 2 as the Niagara Peninsula Tender Fruit and Grape Area, *mineral aggregate operations* and wayside pits and quarries are subject to the following requirements:

- a) No new *mineral aggregate operation*, wayside pits and quarries or any ancillary or accessory use thereto will be permitted between Lake Ontario and the Niagara Escarpment Plan Area;

- b) A new *mineral aggregate operation* or wayside permit may only be considered on primary and secondary selected sand and gravel resources on the Fonthill Kame, in the Town of Pelham, as identified by Aggregate Resource Inventory Paper #4, if the applicant demonstrates that:

- i. Substantially the same land area will be rehabilitated back to an agricultural condition which allows for the same range and productivity of specialty crops common in the area; and,
- ii. The microclimate on which the site and the surrounding area may be dependent for specialty crop production will be maintained.

- c) A new *mineral aggregate operation* or the expansion of an existing operation shall only be permitted in areas not identified in 4.3.2.9 (a) and (b) where the applicant demonstrates the following:

- i. The physical characteristics of the proposed site allow for the rehabilitation of the property back to an agricultural condition, which allows for the same range and productivity of specialty crops common in the area, and allow for the microclimate on which the site and the surrounding area may be dependent for specialty crop production to be maintained; or
- ii. If the physical characteristics of the proposed site will not allow for the rehabilitation of the property back to an agricultural condition, which allows for the same range and productivity of specialty crops common in the area, and will not allow for the microclimate on which the site and the surrounding area may be dependent for specialty crop production to be maintained, the applicant shall consider alternative locations; and
- iii. Where other alternatives have been considered by the applicant and found unsuitable, and in situations where complete agricultural rehabilitation in the *specialty crop area* is not possible due to the depth of planned extraction or a substantial aggregate deposit below the water table warranting extraction, agricultural rehabilitation in the remaining licensed area will be maximized as a first priority to allow production of specialty crops.

9. Where a municipality has undertaken a comprehensive aggregate resource management study and implemented the results into its official plan prior to establishment of this Plan, such policies shall be deemed to conform to this Plan.

10. Municipalities should ensure that all land use activities related to the post extraction rehabilitation of mineral

aggregate operations are consistent with any relevant approved source protection plan and relevant watershed or sub-watershed plan.

4.4 Cultural Heritage Resources

For lands within the Protected Countryside, the following policies shall apply:

1. Cultural heritage resources are defined as man-made or natural features, including structures, objects, neighbourhoods, landscapes and archaeological sites, that have been identified as *significant* by the local municipality or the province for being meaningful components of a community's cultural heritage or identity.
2. Greenbelt municipalities should work with aboriginal groups and other stakeholders to identify and protect cultural heritage resources and plan toward maintaining, developing and using these resources in a manner that will benefit the local community and be compatible with the Greenbelt's vision and goals.
3. Municipalities should build cultural components into their municipal plans and planning processes, including creating inventories of cultural heritage resources and planning for their ongoing protection and appropriate use. Municipal cultural plans should draw from and promote an integrated vision of local cultural development that emphasizes connections across the full range of arts, heritage, cultural industries, libraries, archives and other cultural activity.

4.5 Existing Uses

For lands falling within the Protected Countryside, the following policies shall apply:

1. All *existing uses* lawfully used for such purpose on the day before the Greenbelt Plan comes into force are permitted.
2. Single dwellings are permitted on existing lots of record, provided they were zoned for such as of the date the Greenbelt Plan came into force, or where an application for an amendment to a zoning by-law is required as a condition of a severance granted prior to December 14, 2003 but which application did not proceed.
3. Outside of *settlement areas*, expansions to existing buildings and structures, accessory structures and uses, and/or conversions of legally *existing uses* which bring the use more into conformity with this Plan, are permitted subject to a demonstration of the following:
 - a) Notwithstanding section 4.2.2.6, new municipal services are not required; and
 - b) The use does not expand into *key natural heritage features* and *key hydrologic features*, unless there is no other alternative in which case any expansion shall be limited in scope and kept within close geographical proximity to the existing structure.
4. Expansions to existing agricultural buildings and structures, residential dwellings, and accessory uses to both, may be considered within *key natural heritage features* and *key hydrologic features* if it is demonstrated that:
 - a) There is no alternative and the expansion, alteration or establishment is directed away from the feature to the maximum extent possible; and
 - b) The impact of the expansion or alteration on the feature and its functions is minimized to the maximum extent possible.
5. Expansion, maintenance and/or replacement of existing *infrastructure* is permitted, subject to the *infrastructure* policies of section 4.2.

4.6 Lot Creation

For lands falling within the Protected Countryside, the following policies shall apply:

1. Lot creation is permitted in the Protected Countryside for the range of uses permitted by the policies of this Plan.
2. Lot creation is also permitted in the following circumstances:
 - a) Acquiring land for *infrastructure* purposes, subject to the *infrastructure* policies of section 4.2;
 - b) Facilitating conveyances to public bodies or non-profit entities for natural heritage conservation, provided it does not create a separate lot for a residential dwelling in *specialty crop* or *prime agricultural areas*; and
 - c) Minor lot adjustments or boundary additions, provided they do not create a separate lot for a residential dwelling in *specialty crop* or *prime agricultural areas* and there is no increased fragmentation of a *key natural heritage feature* or *key hydrologic feature*.
3. More specifically, within the *specialty crop area* and *prime agricultural area*, lot creation is permitted for:
 - a) Agricultural uses where the severed and retained lots are intended for agricultural uses and provided the minimum lot size is 40 acres within *specialty crop area* and 100 acres within *prime agricultural areas*;
 - b) Existing and new agriculture-related uses, provided that any new lot will be limited to the minimum size needed to accommodate the use, including a sewage and water system appropriate for such a use;
 - c) The severance of a *residence surplus to a farming operation* as a result of a *farm consolidation*, which residence was an *existing use* as of the date this Plan came into force, provided that the planning authority ensures that a residential dwelling is not permitted in perpetuity on the retained lot of farmland created by this severance. Approaches to ensuring no new residential dwellings on the retained lot of farmland may be recommended by the Province, or municipal approaches that achieve the same objective should be considered; or
 - d) The surplus dwelling policy in 4.6.3 (c) also applies to *rural areas* as defined by municipal official plans. The severance should be limited to the minimum size needed to accommodate the dwelling, including existing and reserve areas for individual sewage and water services.

5.0 IMPLEMENTATION

5.1 Status and Effect

The *Greenbelt Act, 2005*, provides for the establishment of the Greenbelt Plan to be created through an Order in Council, which was filed as OIC208/2005. The *Greenbelt Act, 2005*, also requires that all decisions on planning applications shall conform to the policies in the Greenbelt Plan.

The policies of this Plan do not affect any Aboriginal or treaty right recognized or affirmed by *The Constitution Act, 1982*. The Ontario government shall consult with Aboriginal peoples about decisions that may affect the use of Crown land and resources within the area of the Greenbelt Plan that are subject to Aboriginal treaty rights.

The Greenbelt Plan, including the Introduction, Descriptions, Definitions and Schedules, together with the text and commentary in sections 2.0 and 5.0, shall be read in its entirety and applied in each situation.

5.2 Transition

The *Greenbelt Act, 2005*, requires that decisions with respect to applications made under the *Ontario Planning and Development Act, 1994*, the *Planning Act* or the *Condominium Act, 1998*, which were commenced on or after December 16, 2004 (the date this Plan came into force) and relate to the areas in this Plan designated as Protected Countryside, are required to conform to all applicable policies and provisions of this Plan.

The *Greenbelt Act, 2005*, authorizes the Minister to pass regulations for various prescribed matters to address applications which were commenced prior to December 16, 2004 but for which no decision has been made and for other transitional matters, including the application of prescribed policies for applications made under the *Ontario Planning and Development Act, 1994*, the *Planning Act* or the *Condominium Act, 1998*, which were commenced before December 16, 2004. In addition to such regulations, the *settlement area* policies of section 3.4 of this Plan, as well as those within this section 5.0, provide further direction on how this Plan applies to *existing uses*, applications in process and previous site-specific approvals.

Municipalities should consider the policies of the Greenbelt Plan, as appropriate, when processing applications that are not required to conform to this Plan.

5.2.1 Decisions on Applications Related to Previous Site Specific Approvals

Where an official plan was amended prior to December 16, 2004 to specifically designate land use(s), this approval may continue to be recognized through the conformity exercise addressed in section 5.3 and any further applications required under the *Planning Act* or *Condominium Act, 1998*, to implement the official plan approval are not required to conform with this Plan.

Where a zoning by-law was amended prior to December 16, 2004 to specifically permit land use(s), this approval may continue to be recognized through the conformity exercise described in section 5.3 and any further applications required under the *Planning Act* or *Condominium Act, 1998*, to implement the use permitted by the zoning by-law are not required to conform with this Plan.

Applications to further amend the site-specific official plan or zoning by-law permissions referred to above, for uses similar to or more in conformity with the provision of this Plan are also permitted. All such applications should, where possible, seek to achieve or improve conformity with this Plan.

5.3 Municipal Implementation of Protected Countryside Policies

The *Greenbelt Act, 2005*, provides two main avenues for implementation of the Greenbelt Plan. First, section 7 of the *Greenbelt Act, 2005*, requires municipal and other decisions under the *Planning Act* or the *Condominium Act, 1998*, to conform to the policies in the Greenbelt Plan. Second, section 9 of the *Greenbelt Act, 2005*, requires municipalities to amend their official plan(s) to conform to the Greenbelt Plan.

Municipal official plans shall contain policies that reflect the requirements of this Plan together with a map(s) showing the boundaries of the Greenbelt Area, the Protected Countryside and the Natural Heritage System. Municipalities should provide a map showing known *key natural heritage* and *key hydrologic features* and any associated minimum *vegetation protection zones* identified in this Plan. The identification of the Natural Heritage System boundary will form the basis for applying the policies of section 3.2.

Municipalities should also include a map of *wellhead protection areas* and *vulnerable areas* together with associated policies for these areas within their official plans, as appropriate and in accordance with any provincial directives on source water protection.

Despite the policies in this Greenbelt Plan, there is nothing in this Plan that limits the ability of decision makers on planning applications to

adopt policies that are more stringent than the requirements of the Plan, unless doing so would conflict with any of the policies or objectives of the Plan. With the exception of the lot creation policies of section 4.6, official plans and zoning by-laws shall not, however, contain provisions that are more restrictive than the policies of sections 3.1 and 4.3.2 as they apply to agricultural uses and mineral aggregate resources respectively.

Municipalities may amend the designation for *prime agricultural areas* and/or *rural areas* at the time they bring their official plans into conformity with this Plan, only in the following circumstances:

1. If the upper-tier or single-tier municipality has not amended the designation for its prime agriculture/rural lands to reflect the PPS;
2. If an upper-tier or single-tier has completed a comprehensive official plan review; or
3. In order for a lower tier official plan to conform to an upper tier plan which has been amended in either of the above circumstances.

Such amendments are intended to be minor in nature, solely with a view to rationalizing *prime agricultural area* and *rural area* boundaries.

It is intended that the numerical figures identified in this Plan be considered to be approximate, and that for the purposes of preparing area municipal official plans, zoning by-laws, subdivisions approvals, site plan approvals, severances or building permits, minor deviations may be permitted, without amendment to this Plan, provided that such deviations do not alter the intent of this Plan.

5.4 Relationship of the Plan to the Land Use Planning System

The Greenbelt is governed by the planning policy and regulation, of various levels of government and agencies, which work collectively to manage and guide land use within the Greenbelt.

Provincially, the policies of the NEP, the ORMCP, the Parkway Belt West Plan, and the Protected Countryside policies in this Greenbelt Plan form the fundamental planning framework within which all other planning policies and regulations are contained.

This Greenbelt Plan builds upon the existing policy framework established in the PPS and is to be implemented through municipal official plan policies and maps.

The Greenbelt Plan relies on definitions contained in the PPS where those terms are used in this Plan. All terms defined in the definitions section of this Plan are shown in *italics*, and for ease of use terms defined in the PPS are also included. The Greenbelt Plan also relies on municipal official plan mapping to delineate *prime agricultural areas*, *rural areas* and the detailed boundaries of *settlement areas*.

In addition to the PPS and municipal official plans and related planning mechanisms (e.g. zoning, subdivision of land), conservation authorities, other agencies and the Federal Government have regulations or standards that apply in the Greenbelt. Where an application, matter or proceeding related to these regulations or standards requires consideration of applicable policy, such applications, matters or proceedings shall conform to this Greenbelt Plan together with other provincial plans applying within the Greenbelt. Where there are regulations or standards that are more restrictive than those contained in these plans, the more restrictive provision prevails.

Based on the above, the Greenbelt Plan must be read in conjunction with all other applicable land use planning policy, regulations and/or standards, as amended from time to time. Such documents include but are not limited to: the PPS; Minister's zoning orders under the *Planning Act*; other provincial land use plans; upper, lower and single-tier municipal official plans; zoning by-laws; regulations such as those under the *Conservation Authorities Act*, as well as other pertinent legislation (e.g. the federal *Fisheries Act*) and regulations. Where more specific provincial plans or regulations exist or are promulgated within the

Greenbelt, including plans under the *Ontario Planning and Development Act, 1994*, the more specific plan or regulation prevails.

The Greenbelt Plan itself must also be read in its entirety as existing or proposed land uses may be subject to policies within different sections of the Plan. Where multiple policies apply, these are to be applied in either a cumulative or integrated manner, such that all of the policies that relate to a matter are addressed, with the more specific or restrictive policy applying where there are conflicts. Policies are not meant to be read in isolation or to the exclusion of the rest of the policies, both general and specific. As well, the schedules within the Greenbelt Plan need to be read to determine the applicable policies within the Plan relating to the various designations, information and/or boundaries shown on these schedules.

5.5 Boundaries, Schedules and Appendices

5.5.1 Boundary of the Greenbelt Plan

The Boundary of the Greenbelt Plan as shown on Schedules 1 and 4 of the Greenbelt Plan is prescribed by Ontario Regulation 59/05, as provided by the *Greenbelt Act, 2005*.

The boundary of the Greenbelt Plan as described in Ontario Regulation 59/05 provides the information for establishing the boundary on the ground by a Licensed Ontario Land Surveyor (under instructions from the Surveyor General for the Province of Ontario).

5.5.2 Boundaries Internal to the Greenbelt Plan

Boundaries of the Natural Heritage System may be refined at the time of municipal conformity in accordance with the Natural Heritage System policies of section 3.2.2.6.

Boundaries of the *prime agricultural areas* and *rural areas* are as established in municipal official plans, subject to section 5.3.

Boundaries of Towns/Villages are shown on the Schedules to this Plan but for detailed delineation and the boundaries of hamlets, which are only shown as symbols, reference must be made to municipal official plans.

Boundaries of *key natural heritage features* and *key hydrologic features* and any minimum *vegetation protection zones* identified in this Plan are to be shown in municipal official plans. The detailed delineation of these features and zones can be undertaken by municipalities and/or conservation authorities when dealing with applications for development under the *Planning Act* or *Condominium Act, 1998* or via a municipal zoning by-law update.

5.5.3 Schedules and Appendices

The Greenbelt Plan contains four schedules, identifying:

1. The Greenbelt Plan area, which delineates the NEP Area, the Oak Ridges Moraine Area and Protected Countryside Area (including Towns/Villages and Hamlets);
2. The boundary of the Niagara Peninsula Tender Fruit and Grape Area;
3. The boundary of the Holland Marsh; and
4. The Natural Heritage System.

In addition, the Plan contains two maps in an Appendix, for reference.

5.6 Plan Review

Through the requirement for a 10-year review, the province is ensuring that the Greenbelt Plan will not remain static and will not become irrelevant over time.

The 10-year review of the Greenbelt Plan will be coordinated with the reviews of the NEP and the ORMCP, which includes any adjustments necessary to align the timing of these reviews.

The purpose of the review is to assess the effectiveness of the policies contained in the Plan (using information gathered through the monitoring program, and conducted through a public process), and make amendments, if appropriate, to update or include new information or improve the effectiveness and relevance of the policies.

The review can only consider modifications to the urban boundaries within the Greenbelt if the upper or single-tier municipality provides a comprehensive justification or growth management study.

5.7 Amendments to Greenbelt Plan and other Provincial Plans

Under the *Greenbelt Act, 2005*, amendments to those areas of the Plan designated as Protected Countryside can only be proposed by the Minister of Municipal Affairs and Housing. Amendments are subject to the approval of the Lieutenant Governor in Council.

Amendments to the Plan shall not have the effect of reducing the total land area of the Greenbelt Plan.

Amendments could be considered outside the 10-year review in the following circumstances:

1. There are major unforeseen circumstances, or major new Provincial policy, legislation or regulation that create the need for an amendment;
2. The overall effectiveness and integrity of the Plan would be threatened if the amendment were deferred to the next 10-year review; or
3. The effectiveness and/or relevance of the Plan's policies would be improved through an amendment.

Amendments to the NEP remain governed by, and are to be dealt in accordance with, the provisions of the *Niagara Escarpment Planning and Development Act*.

Amendments to the ORMCP remain governed by, and are to be dealt in accordance with, the *Oak Ridges Moraine Conservation Act, 2001*.

Amendments to the Parkway Belt West Plan remain governed by, and are to be dealt in accordance with, the *Ontario Planning and Development Act, 1994*, but are also subject to the policies of sections 2.0, 3.2 and 3.3 of this Plan.

5.8 Monitoring/Performance Measures

The objective of the monitoring framework is to evaluate the effectiveness of the policies of the Plan in achieving its goals, as identified in section 1.2.

Performance measures are to be established through the Ministry of Municipal Affairs and Housing's Municipal Performance Measurement Program.

In this regard, the Ontario Government will work with other ministries, municipalities and stakeholders to:

1. Identify appropriate performance indicators to measure the effectiveness of the Plan;
2. Identify roles and responsibilities among partners in the collection and analysis of the indicators; and
3. Provide for periodic collation, publication and discussion of the results.

5.9 Greenbelt Council

The Province will establish a Greenbelt Council and provide it with a varied mandate, which could evolve over time. Initially, it is anticipated that the Greenbelt Council will consider how the implementation of the plan is proceeding, including the identification of issues arising from implementation.

The Greenbelt Council will also provide input and advice on the identification and establishment of performance measures, which will be used to track the success of the Greenbelt Plan in achieving its goals. Such advice should take advantage of the local knowledge of the Council's members and other stakeholders, with a view to identifying the most effective and least costly performance measures that build on the ability of local communities and associations to provide meaningful input and information.

Over the short to mid term, the Council could play a meaningful role in helping to coordinate efforts of municipalities, conservation authorities, associations and other stakeholders in matters which cross municipal boundaries such as trail systems, water resources, *watershed plans* and programs and agricultural activities. The Greenbelt Council could also provide advice on ways of promoting the Greenbelt and on any amendments proposed to the Plan.

Over the long-term and particularly as the time for the 10-year review of the Greenbelt Plan approaches, it is expected that the Greenbelt Council will play an important role in helping to shape and/or focus the nature and/or content of the review. This could be achieved through Council conducting its own public process to obtain stakeholder views by consulting with municipalities and other stakeholder groups, which would then form the basis for the government to frame the formal review required by the proposed *Greenbelt Act, 2005*.

Definitions

Agricultural uses

Means the growing of crops, including nursery and horticultural crops; raising of livestock; raising of other animals for food, fur or fibre, including poultry and fish; aquaculture; apiaries; agro-forestry; maple syrup production; and associated on-farm buildings and structures, including accommodation for full-time farm labour when the size and nature of the operation requires additional employment (PPS, 2005).

Agricultural-related uses

Means those farm-related commercial and farm-related industrial uses that are small scale and directly related to the farm operation and are required in close proximity to the farm operation (PPS, 2005).

Alvars

Naturally open areas of thin or no soil over essentially flat limestone, dolostone or marble rock, supporting a sparse vegetation cover of mostly shrubs and herbs.

Connectivity

Means the degree to which key natural heritage or key hydrologic features are connected to one another by links such as plant and animal movement corridors, hydrologic and nutrient cycling, genetic transfer, and energy flow through food webs.

Development

Means the creation of a new lot, a change in land use, or the construction of buildings and structures, any of which require approval under the Planning Act, or that are subject to the Environmental Assessment Act, but does not include:

- (a) shall be determined by the Board in accordance with all applicable provisions of the Act and the regulations; and

- (b) $RPEM_{ON}$ shall be no lower than $RPEM_{MID}$ and $RPEM_{MID}$ shall be no lower than $RPEM_{OFF}$;
- (c) each of the off-peak period, mid-peak period and on-peak period shall mean any period during a day, expressed as running from a specified hour to another specified hour, designated as such by the Board in accordance with the RPP Manual and which may be different for electricity use that occurs in the period May 1 to October 31 and for electricity use that occurs in the period November 1 to April 30; and

Amendments to the Retail Settlement Code**March 11, 2005**

The Retail Settlement Code is amended by adding the following new section 1.9:

1.9 Special Provisions for RPP Consumers and New SSS Code

1.9.1 The following definitions apply for the purposes of this section 1.9:

- (a) "competitive retailer" means a person who retails electricity to consumers, but does not include a person who retails electricity to consumers who take SSS other than transitional consumers;
- (b) "RPP consumer" means a consumer that pays the regulated price;
- (c) "regulated price" means the commodity price for electricity referred to in section 3.3 or 3.4 of the SSS Code;
- (d) "SSS Code" means the code issued by the Board and in effect at the relevant time which, among other things, establishes the manner in which a distributor must meet its obligation to sell electricity under section 29 of the Electricity Act; and
- (e) "transitional consumer" means a consumer:
 - i. who entered into or renewed a contract with a retailer on or before December 9, 2002 with respect to which a service transaction request is or has been implemented to enable the consumer to purchase electricity from a competitive retailer;
 - ii. whose contract referred to in paragraph (i) is in effect but has not been renewed since December 9, 2002;
 - iii. who is, in accordance with regulations made under the Act, eligible to pay the regulated price; and

- iv. who is not an electing spot consumer (as defined in the SSS Code).

1.9.2 Notwithstanding any other provision of this Code, the commodity price per kilowatt hour for electricity payable by an RPP consumer shall be determined by a distributor, or by a competitive retailer in the case of a transitional consumer that is being billed using retailer-consolidated billing, in accordance with the SSS Code. All provisions of this Retail Settlement Code that apply to an RPP consumer shall be interpreted accordingly.

1.9.3 The following sections of the SSS Code apply to a competitive retailer that is billing a transitional consumer using retailer-consolidated billing:

- (a) sections 1.7.2 to 1.7.5;
- (b) section 2.6.1;
- (c) sections 3.3.5 and 3.3.6;
- (d) section 3.4.3; and
- (e) section 3.7.

A competitive retailer shall comply with the obligations contained in those sections (if they are expressed in mandatory terms) to the same extent as if they were contained in this Code and referred to a competitive retailer rather than to a distributor.

1.9.4 Nothing in this Code shall be interpreted as allowing a distributor to provide standard supply service (as defined in the SSS Code) through a third party unless the distributor is authorized to do so by or under the SSS Code.

1.9.5 This section 1.9 shall come into force on the first term commencement date (as defined in the SSS Code).

(Eggs — Marketing Limitations)

Note: Regulation 408 has not previously been amended.

1. Regulation 408 of the Revised Regulations of Ontario, 1990 is amended by adding the following French version:**OEUFS — RESTRICTIONS EN MATIÈRE DE COMMERCIALISATION**

1. La Commission estime nécessaire et opportun et exige que la commission locale réalise l'objet du plan de commercialisation des oeufs de l'Ontario conformément à l'annexe.

2. Les articles 1, 2 et 3 du Règlement 407 des Règlements refondus de l'Ontario de 1990 s'appliquent au présent règlement, avec les adaptations nécessaires.

ANNEXE

1. Les définitions qui suivent s'appliquent à la présente annexe.

«contingent» Contingent fixé et alloué à un producteur aux termes de l'article 7 du Règlement 407 des Règlements refondus de l'Ontario de 1990. («quota»)

«Office» L'Office canadien de commercialisation des oeufs. («Agency»)

«système de contingentement» Méthode par laquelle le contingent fixé et alloué à un producteur est déterminé. («quota system»)

2. La commission locale établit un système de contingentement afin de fixer des contingents et de les allouer à tous les producteurs d'oeufs ou d'oeufs d'incubation en Ontario, de sorte que le nombre de douzaines d'oeufs et d'oeufs d'incubation produits en Ontario et dont la commercialisation dans le commerce intraprovincial était autorisée en 1973, ajouté au nombre de douzaines d'oeufs et d'oeufs d'incubation produits en Ontario et dont la commercialisation dans le commerce interprovincial et celui d'exportation était autorisée la même année, conformément aux contingents attribués par l'Office, et au nombre de douzaines d'oeufs et d'oeufs d'incubation produits dans la province et devant être commercialisés cette année-là autrement que selon ce qu'autorisait un contingent attribué par l'Office ou fixé et alloué par la commission locale, soit égal au nombre de douzaines d'oeufs et d'oeufs d'incubation indiqué à l'article 3 de la présente annexe.

3. Pour l'application de l'article 2 de la présente annexe, le nombre de douzaines d'oeufs et d'oeufs d'incubation indiqué au présent article est celui figurant au tableau et représente le pourcentage de la production canadienne totale figurant à ce même tableau.

TABEAU

181 267 000 douzaines : 38,161 pour 100

4. (1) Ne doit être rendue aucune ordonnance ni pris aucun règlement dont l'effet serait de porter à un nombre qui, sur une base annuelle, est supérieur au nombre de douzaines d'oeufs et d'oeufs d'incubation indiqué à l'article 3 de la présente annexe le total de ce qui suit :

- le nombre de douzaines d'oeufs et d'oeufs d'incubation produits en Ontario et dont la commercialisation dans le commerce intraprovincial ou interprovincial et le commerce d'exportation est autorisée par des contingents fixés et alloués par la commission locale et par des contingents attribués par l'Office;
- le nombre de douzaines d'oeufs et d'oeufs d'incubation produits en Ontario et devant être commercialisés dans le commerce intraprovincial ou interprovincial et le commerce d'exportation autrement que selon ce qu'autorisent des contingents fixés et alloués par la commission locale et des contingents attribués par l'Office.

La présente règle ne s'applique toutefois pas si la commission locale a tenu compte des facteurs suivants et que l'Office rend une ordonnance ou prend un règlement à cet effet :

- le principe des avantages comparatifs de production à l'égard de chaque province du Canada;

- d) toute variation de la taille du marché des oeufs ou des oeufs d'incubation;
- e) tout défaut des producteurs de commercialiser le nombre de douzaines d'oeufs ou d'oeufs d'incubation dont la commercialisation est autorisée;
- f) la faisabilité d'augmenter la production dans chaque province où les oeufs doivent être commercialisés;
- g) les frais de transport comparatifs vers des secteurs de marché à partir de sources alternatives de production.

(2) Ne doit être rendue aucune ordonnance ni pris aucun règlement dont l'effet serait de porter à un nombre qui, sur une base annuelle, est inférieur au nombre de douzaines d'oeufs et d'oeufs d'incubation indiqué à l'article 3 de la présente annexe le total de ce qui suit :

- a) le nombre de douzaines d'oeufs et d'oeufs d'incubation produits en Ontario et dont la commercialisation dans le commerce intraprovincial ou interprovincial et le commerce d'exportation est autorisée par des contingents fixés et alloués par la commission locale et par des contingents attribués par l'Office;
- b) le nombre de douzaines d'oeufs et d'oeufs d'incubation produits en Ontario et devant être commercialisés dans le commerce intraprovincial ou interprovincial et le commerce d'exportation autrement que selon ce qu'autorisent des contingents fixés et alloués par la commission locale et des contingents attribués par l'Office.

La présente règle ne s'applique toutefois pas si, en même temps, il y a une diminution proportionnelle du nombre de douzaines d'oeufs ou d'oeufs d'incubation produits dans chaque autre province du Canada et dont la commercialisation dans le commerce intraprovincial ou interprovincial et le commerce d'exportation est autorisée.

(3) Lorsque l'Office a rendu une ordonnance ou pris un règlement en vertu des dispositions d'un plan de commercialisation semblable à celui énoncé au paragraphe (1) ou (2), la commission locale rend une ordonnance ou prend un règlement semblable.

5. Sous réserve de l'article 10 du Règlement 407 des Règlements refondus de l'Ontario de 1990, la commission locale, lorsqu'elle exerce ses pouvoirs en vertu des alinéas 7 (2) d) et 7 (4) d) de ce règlement, peut exiger que des oeufs ou des oeufs d'incubation lui soient vendus à elle-même ou qu'ils soient vendus à son agent à un prix ne dépassant pas la différence, le cas échéant, entre le prix réalisé par celle-ci ou son agent lors de leur commercialisation et les frais qu'elle a engagés à cet égard.

6. La commission locale ne doit pas commercialiser une quantité d'oeufs ou d'oeufs d'incubation mise à sa disposition qui dépasse le nombre d'oeufs indiqué aux articles 2 et 3 ou tel que modifié aux termes de l'article 4 de la présente annexe sans consultation préalable de l'Office.

7. Avec l'assentiment de l'Office, la commission locale applique au nom de celui-ci toutes les ordonnances qu'il a rendues et tous les règlements qu'il a pris en vue d'établir et de mettre en oeuvre un système de contingentement ou les ordonnances ou règlements nécessaires à la mise en oeuvre des dispositions de la Proclamation visant l'Office canadien de commercialisation des oeufs.

8. La commission locale prend, rend, approuve et met en oeuvre les ordonnances ou règlements nécessaires pour donner effet à la présente annexe.

9. La commission locale met à la disposition de l'Office tout document ou extrait de documents qui établit l'enregistrement des producteurs ou la délivrance de permis à ces derniers.

10. Avec l'assentiment de l'Office, la commission locale recueille en son nom les redevances qu'il perçoit.

11. (1) Lorsqu'elle met en application les alinéas 4 a) et b) du Règlement 407 des Règlements refondus de l'Ontario de 1990, la commission locale exige que les producteurs, producteurs-classeurs, marchands, grossistes et transformateurs fournissent tous les renseignements nécessaires pour suivre les ventes d'oeufs et d'oeufs d'incubation.

(2) La commission locale établit un système de vérification des ventes.

(3) La commission locale fournit à l'Office, lorsqu'il le lui demande, tous les renseignements obtenus par l'intermédiaire du système visé au paragraphe (2).

12. La commission locale prend les mesures raisonnables pour promouvoir une collaboration étroite avec l'Office et notamment :

- a) met à la disposition de l'Office ses dossiers, procès-verbaux et décisions concernant toute question d'intérêt pour ce dernier;
- b) permet à un dirigeant ou employé de l'Office que désigne ce dernier à cette fin d'assister aux réunions de la commission locale auxquelles une question d'intérêt pour lui sera vraisemblablement discutée et, à cette fin, donne avis de ces réunions au dirigeant ou à l'employé désigné;
- c) donne avis à l'Office de chaque ordonnance ou règlement qu'elle se propose de prendre ou de rendre et qui est susceptible d'avoir une incidence sur les activités de l'Office.

13. L'autorité et les pouvoirs visés dans le Règlement 407 des Règlements refondus de l'Ontario de 1990 sont limités par la présente annexe et assujettis à celle-ci.

Amending O. Reg. 145/04

(Grants for Student Needs — Legislative Grants for the 2004-2005 School Board Fiscal Year)

Note: Ontario Regulation 145/04 has previously been amended. Those amendments are listed in the Table of Regulations and Legislative History Overview which can be found at www.e-Laws.gov.on.ca.

1. Section 18 of Ontario Regulation 145/04 is revoked and the following substituted:**ISA levels 2 and 3 amount**

18. The ISA levels 2 and 3 amount for a board is determined as follows:

1. Take the sum of the amounts determined in respect of the board under subsections 17 (2) and 18 (2) of the 2003-2004 grant regulation.
2. Subtract the greatest of the following amounts:
 - i. The amount determined using the following formula:

$$((A - B) - C) - (0.04 \times D)$$

in which,

“A” is the amount that was in the board’s special education reserve fund on August 31, 2003,

“B” is the amount, if any, that was in the board’s special education reserve fund on August 31, 2003, that was not required to be placed in that reserve fund under section 41 of Ontario Regulation 156/02 or a predecessor of that section,

“C” is the greater of zero and the difference between,

(a) the amount that would have been determined under subsection 42 (3) of the 2003-2004 grant regulation if that amount had been determined on the basis of the board’s expenditures on special education that the board had authorized by motions passed before July 1, 2004 or that it had otherwise decided, before July 1, 2004, that it would make in the 2003-2004 fiscal year, and

(b) the special education allocation for the board determined under section 14 of the 2003-2004 grant regulation, and

“D” is the amount that was determined in respect of the board under clause 17 (b) of Ontario Regulation 156/02.

ii. The amount determined using the following formula:

$$E - (0.02 \times F)$$

in which,

“E” is the amount that was in the board’s special education reserve fund on August 31, 2004, and

“F” is the sum of the ISA level 2 claim and the ISA level 3 claim determined in respect of the board under subsections 17 (2) and 18 (2), respectively, of the 2003-2004 grant regulation.

iii. Zero.

3. Add the amount determined as follows:

i. Take the number of pupils who were enrolled in a school operated by the board on October 31, 2004, who were not enrolled in a school operated by the board on October 31, 2003 and who, in the opinion of the Minister, meet one of the following criteria:

A. The pupil was enrolled in a class in which there was no less than one adult assigned for every four students where the adult was employed in special education programs and was a teacher, teaching assistant, professional or paraprofessional within the meaning of Appendix H of the 2004-05 School Board Estimates, dated May 26, 2004.

B. The full-time equivalent of at least one teaching assistant, professional or paraprofessional within the meaning of Appendix H of the 2004-05 School Board Estimates, dated May 26, 2004 was assigned to the pupil for, on average, no less than one-half of each instructional day in the 2004-2005 school year.

ii. Subtract the number of pupils who meet both of the following criteria. If the difference is a negative number, the number determined under this paragraph is zero:

A. The pupil is a pupil in respect of whom an ISA level 2 claim or an ISA level 3 claim was approved within the meaning of subsections 17 (1) and 18 (1), respectively, of the 2003-2004 grant regulation.

B. The pupil is not enrolled in a school of the board on October 31, 2004.

iii. Multiply the number determined under subparagraph ii by \$17,000.

iv. Calculate the sum of the amounts determined under subparagraph iii for all boards.

v. If the amount determined under subparagraph iv is equal to or less than \$62 million, the amount determined under this paragraph is the amount determined under subparagraph iii. If the amount determined under subparagraph iv is greater than \$62 million, the amount determined under this paragraph is the amount determined by,

A. multiplying the amount determined under subparagraph iii by \$62 million, and

B. dividing the amount determined under sub-subparagraph A by the amount determined under subparagraph iv.

18. La somme liée à l'AAS des niveaux 2 et 3 pour un conseil est calculée de la manière suivante :

1. Prendre le total des sommes calculées à l'égard du conseil en application des paragraphes 17 (2) et 18 (2) du règlement sur les subventions de 2003-2004.
2. Soustraire la plus élevée des sommes suivantes :
 - i. La somme calculée selon la formule suivante :

$$((A - B) - C) - (0,04 \times D)$$

où :

«A» représente la somme qui figurait dans le fonds de réserve pour l'éducation de l'enfance en difficulté du conseil le 31 août 2003;

«B» représente la somme éventuelle qui figurait dans le fonds de réserve pour l'éducation de l'enfance en difficulté du conseil le 31 août 2003, mais dont l'article 41 du Règlement de l'Ontario 156/02, ou un article que celui-ci remplace, n'exigeait pas le versement à ce fonds de réserve;

«C» représente la somme la plus élevée entre zéro et la différence entre les sommes suivantes :

- a) d'une part, la somme qui aurait été calculée en application du paragraphe 42 (3) du règlement sur les subventions de 2003-2004 si elle avait été calculée en se fondant sur les dépenses affectées à des mesures d'éducation de l'enfance en difficulté que le conseil avait autorisées par motion adoptée avant le 1^{er} juillet 2004 ou qu'il avait autrement décidé, avant cette date, d'engager pour l'exercice 2003-2004;

«D» représente la somme qui est calculée à l'égard du conseil en application de l'alinéa 17 b) du Règlement de l'Ontario 156/02.

- ii. La somme calculée selon la formule suivante :

$$E - (0,02 \times F)$$

où :

«E» représente la somme qui figurait dans le fonds de réserve pour l'éducation de l'enfance en difficulté du conseil le 31 août 2004;

«F» représente la somme obtenue en additionnant la somme liée à la demande d'AAS de niveau 2 et la somme liée à la demande d'AAS de niveau 3 qui sont calculées à l'égard du conseil en application des paragraphes 17 (2) et 18 (2), respectivement, du règlement sur les subventions de 2003-2004.

iii. Zéro.

3. Ajouter la somme calculée de la manière suivante :

- i. Prendre le nombre d'élèves qui étaient inscrits à une école qui relève du conseil le 31 octobre 2004, mais non le 31 octobre 2003, et qui, de l'avis du ministre, satisfont à l'un des critères suivants :

- A. Chaque élève était inscrit à une classe où au moins un adulte était affecté pour quatre élèves si l'adulte était employé dans le cadre de programmes d'enseignement à l'enfance en difficulté en qualité d'enseignant, d'aide-enseignant, de professionnel ou de paraprofessionnel au sens de l'annexe H des prévisions budgétaires de 2004-2005 des conseils scolaires de district, datées du 26 mai 2004.
- B. L'équivalent d'au moins un aide-enseignant, un professionnel ou un paraprofessionnel à temps plein, au sens de l'annexe H des prévisions budgétaires de 2004-2005 des conseils scolaires de district, datées du 26 mai 2004, était affecté à chaque élève pendant, en moyenne, au moins la moitié de chaque journée d'enseignement de l'année scolaire 2004-2005.

 - A. Il s'agit d'un élève à l'égard duquel une demande d'AAS de niveau 2 ou de niveau 3 a été approuvée au sens des paragraphes 17 (1) et 18 (1), respectivement, du règlement sur les subventions de 2003-2004.
 - B. L'élève n'est pas inscrit à une école du conseil le 31 octobre 2004.
- iii. Multiplier le nombre obtenu en application de la sous-disposition ii par 17 000 \$.
- iv. Calculer le total des sommes calculées en application de la sous-disposition iii pour tous les conseils.
- v. Si la somme calculée en application de la sous-disposition iv est égale ou inférieure à 62 millions de dollars, la somme calculée en application de la présente disposition est celle qui est calculée en application de la sous-disposition iii. Si la somme calculée en application de la sous-disposition iv est supérieure à 62 millions de dollars, la somme calculée en application de la présente disposition est celle qui est calculée de la manière suivante :
 - A. multiplier la somme calculée en application de la sous-disposition iii par 62 millions de dollars,
